## Enduring Understanding

---

Intellectual property is any product of the human intellect that the law protects from unauthorized use by others. Intellectual property is traditionally comprised of four categories: patent, copyright, trademark, and trade secrets

## Essential Questions

---

How can a person or business protect an invention or original expression from being used by others? How does a trademark add value to a business? Why are trade secrets protected?

## Knowledge and Skills

---

Students will be able to explain intellectual property and its 4 main categories

Students will be able to differentiate between the types of intellectual property

Students will be able to analyze an “invention” and determine if a patent could be granted based on criteria of original and not obvious

Students will be able to explain the brand power that is associated with trademarks and articulate the damages that could arise if the trademark is violated

Students will be able to identify and categorize trade secrets from common knowledge

Students will be able to describe how non-disclosure agreements help protect trade secrets

## **Transfer Goals**
