

Unit 1- The First Americans

Unit Summary

There are two major migration theories as to how the first Americans arrived here. The ancient civilizations of Central and South America (Maya, Inca, Aztec) developed distinct cultural contributions (language, road systems, agricultural systems, etc.) and identities prior to European arrival. Early North American cultures adapted to their geographic environments and developed differently in terms of clothing, shelter, food, and beliefs. Analysis of current events exposes present-day cultural stereotypes and bias. The arrival of Europeans dramatically changed both the landscape and lives of native populations.
