

Day and Night - Light, Seasons, Patterns

Content Area: **Unified Arts**
Course(s):
Time Period: **May**
Length: **30 Days**
Status: **Published**

Unit Summary

In this unit, students will record information and make observations to describe patterns and/or relationships in the natural and designed world(s). By the end of this unit, students will be able to independently observe patterns in the sky and understand that they are part of a large universe where we can make predictions because of patterns.

Student Learning Objectives

Students will learn...

- they are part of a large universe where we can make predictions because of patterns.
- to observe patterns in the sky.

Essential Questions

- What patterns can we observe in the night sky?
- How do patterns in our large universe help us to make predictions?
