

Unit 5: Cooperative Games 5

Content Area: **Unified Arts**
Course(s): **Physical Education 5**
Time Period: **September**
Length: **10 Days**
Status: **Published**

Unit Summary

Cooperative games allow the students to work together to solve problems and complete challenges as a group. The games challenge the students at a physical level, cognitive level, social, and emotional level. All activities are completed in a safe, caring environment where all ideas are accepted and attempted as students communicate and collaborate to accomplish each task (even those without a single solution).

Standards

Learning Objectives

Students will learn to:

- collaborate to accomplish a task together.
- use effective communication skills when completing tasks together.
- show creativity when completing challenges.
- use problem solving skills to accomplish a task together.

Essential Questions

Why are cooperative games helpful in learning?

Enduring Understandings

Students will understand that:

- cooperative games are beneficial for students.
- cooperative games require certain skills to accomplish and achieve goals.

Application

Students will be able to independently use their learning to work towards finishing tasks and challenges presented to them.

Skills

Students will be skilled at:

- demonstrating communication skills.
- analyzing effective practices for group participation.
- practicing best practices for achieving goals.
