

Unit 8: Display, Describe, and Summarize Data

Content Area: **Math**
Course(s): **Math Gr. 6**
Time Period: **MayJun**
Length: **21 Days**
Status: **Published**

Unit 8: Display, Describe, and Summarize Data

Department of Curriculum and Instruction

Belleville Public Schools

Curriculum Guide

Mathematics: Grade 6

Unit 8: Display, Describe, and Summarize Data

Belleville Board of Education

102 Passaic Avenue

Belleville, NJ 07109

Prepared by: Ms. Patricia Drudy

Dr. Richard Tomko, Ph.D., M.J., Superintendent of Schools

Ms. LucyAnn Demikoff, Director of Curriculum and Instruction K-12

Ms. Nicole Shanklin, Director of Elementary Education K-8, ESL Coordinator K-12

Mr. George Droste, Director of Secondary Education

Board Approved: September 23, 2019

Unit Overview

Unit 8 focuses on developing an understanding of variability and the concept of statistical measure. Students learn to recognize statistical questions, describe and summarize data using measures of center and variability, and display data using box plots and histograms.

Enduring Understandings

- Recognize statistical questions
- Summarize data using mean, median, mode, and range
- Display data in box plots
- Display data in frequency tables and histograms
- Summarize data using measures of variability
- Choose appropriate statistical measures
- Summarize data distributions

Essential Questions

- How can data be described by a single number?
- How can tables and graphs be used to represent data and answer questions?

Exit Skills

By the end of Grade 6, Math Unit 8, students will be able to:

- Recognize statistical questions. Summarize data using mean, median, mode, and range
- Display data in box plots
- Display data in frequency tables and histograms
- Summarize data using measures of variability
- Choose appropriate statistical measures
- Summarize data distributions

New Jersey Student Learning Standards (NJSL)

The [Math Practices](#), as put forth by the National Council of Teachers of Mathematics (NCTM), are connected within all lessons:

MP.1 - Make sense of problems and persevere in solving them.

MP.2 - Reason abstractly and quantitatively.

MP.3 - Construct viable arguments and critique the reasoning of others.

MP.4 - Model with mathematics.

MP.5 - Use appropriate tools strategically.

MP.6 - Attend to precision.

MP.7 - Look for and make use of structure.

MP.8 - Look for and express regularity in repeated reasoning.

MA.4.OA.A.3	Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.
MA.6.SP.A.1	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers.
MA.6.SP.A.2	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.
MA.6.SP.A.3	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.
MA.6.SP.B.4	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
MA.6.SP.B.5	Summarize numerical data sets in relation to their context, such as by:
MA.6.SP.B.5a	Reporting the number of observations.
MA.6.SP.B.5b	Describing the nature of the attribute under investigation, including how it was measured

	and its units of measurement.
MA.6.SP.B.5c	Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.
MA.6.SP.B.5d	Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.
MA.K-12.5	Use appropriate tools strategically.
MA.K-12.6	Attend to precision.

Interdisciplinary Connections

LA.L.6.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 6 reading and content, choosing flexibly from a range of strategies.
LA.RL.6.1	Cite textual evidence and make relevant connections to support analysis of what the text says explicitly as well as inferences drawn from the text.
LA.SL.6.4	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate speaking behaviors (e.g., eye contact, adequate volume, and clear pronunciation).

Learning Objectives

- Identify statistical questions
- Write statistical questions and display the collected data
- Determine the mean, median, mode, and range of a data set
- Display data in a box plot
- Interpret and analyze a box plot
- Organize data into equal intervals and display data in frequency table or histogram
- Interpret and analyze histogram
- Calculate the mean absolute deviation (MAD) and interquartile range (IQR) of a data set
- Summarize data using measures of variability
- Select the most appropriate measure of center and variability for a data set
- Use measures to describe data sets
- Describe the center, spread, and overall shape of a data set
- Summarize numerical data sets using measures of center and related measure of variability

Suggested Activities & Best Practices

Embedded in Pearson TE, Grade 6:

- Unit 8 Stem Project: In this project students explore earthquakes and how engineers design bridges, dams,

roadways and other structures that can withstand earthquakes.

- Survey Project: Who Am I? We Are We? Students [develop a survey](#) in order to collect data about our sixth grade community. Students then display their data in multiple ways including bar graphs, line plots, histograms, and pie charts.

- Representing Variability with Mean, Median, Mode, and Range: [this lesson](#) unit is intended to help you assess how well students are able calculate the mean, median, mode, and range from a frequency chart; and use a frequency chart to describe a possible data set, given information on the mean, median, mode, and range.

Assessment Evidence - Checking for Understanding (CFU)

- Common Formative Assessments (Formative)
- Common Summative Assessments (Summative)
- District Benchmark (Benchmark)
- Do Now
- Exit Tickets
- Higher-order Questioning / Rich Discussion
- KWL Chart
- Learning Center Activities
- Performance Task (Alternative)
- Quick Write
- Quizzes (Formative)
- Rubrics
- Surveys
- Teacher Observation Checklist
- Think-Pair-Share
- Turn-and-Talk / Share-out
- Unit Assessments (Summative)
- WIK / WINK

Primary Resources & Materials

EnVision Math Teacher Edition

[PearsonRealize.com](https://www.pearsonrealize.com)

Ancillary Resources

[New Jersey Student Learning Standards for Mathematics](#)

[NJSLS Mathematics Crosswalk](#)

[IXL Learning](#)

[NCTM Illuminations](#)

Technology Infusion

- Unit 8 3-Act Mathematical Modeling: Vocal Range - Students will be tasked with deciding which contestant should win a singing contest using both informal argument and statistical reasoning.
- Online Practice with Math IXL for School. Assign Grade 6 HH1 to HH9 to practice summarizing data using statistical measures.
- Video Tutorials: Students can access instructional videos with the Virtual Nerd app. to reinforce how to find the mean, median, mode and range of a set of data.

- Technology;
- Visual and Performing Arts

CRP.K-12.CRP7.1	Career-ready individuals are discerning in accepting and using new information to make decisions, change practices or inform strategies. They use reliable research process to search for new information. They evaluate the validity of sources when considering the use and adoption of external information or practices in their workplace situation.
TECH.8.1.8.A.1	Demonstrate knowledge of a real world problem using digital tools.
TECH.8.1.8.A.CS2	Select and use applications effectively and productively.
TECH.8.1.8.B.CS1	Apply existing knowledge to generate new ideas, products, or processes.

21st Century Skills/Interdisciplinary Themes

- Communication and Collaboration
- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Information Literacy
- Life and Career Skills
- Media Literacy

21st Century Skills

- Civic Literacy
- Environmental Literacy
- Financial, Economic, Business and Entrepreneurial Literacy
- Global Awareness
- Health Literacy

Differentiation

- Use the "Quick Check" feature on Pearson Realize (embedded in each Unit) to help determine the strategy for differentiating instruction; the "Assess and Differentiate" page will prescribe the differentiated instructional activity

Differentiations:

- Small group instruction
- Small group assignments
- Extra time to complete assignments
- Pairing oral instruction with visuals
- Repeat directions

- Use manipulatives
- Center-based instruction
- Token economy
- Study guides
- Teacher reads assessments aloud
- Scheduled breaks
- Rephrase written directions
- Multisensory approaches
- Additional time
- Preview vocabulary
- Preview content & concepts
- Story guides
- Behavior management plan
- Highlight text
- Student(s) work with assigned partner
- Visual presentation
- Assistive technology
- Auditory presentations
- Large print edition
- Dictation to scribe

Hi-Prep Differentiations:

- Alternative formative and summative assessments
- Choice boards
- Games and tournaments
- Group investigations
- Guided Reading
- Independent research and projects
- Interest groups
- Learning contracts
- Leveled rubrics
- Literature circles
- Multiple intelligence options
- Multiple texts
- Personal agendas
- Project-based learning
- Problem-based learning
- Stations/centers
- Think-Tac-Toes
- Tiered activities/assignments
- Tiered products
- Varying organizers for instructions

Lo-Prep Differentiations

- Choice of books or activities
- Cubing activities
- Exploration by interest
- Flexible grouping
- Goal-setting with students
- Jigsaw
- Mini workshops to re-teach or extend skills
- Open-ended activities
- Think-Pair-Share
- Reading buddies
- Varied journal prompts
- Varied supplemental materials

Special Education Learning (IEP's & 504's)

- Consider Intervention Activity and/or Reteach e.g. Topic 8-1, pg. 458A
- Use suggestions under Technology Center section in Pearson Realize to target students with disabilities
- Use the [Pacer Center Action Information Sheet](#) for research-based ideas on accommodations and modifications

- Allow for open-note/open-book assessments
- Check classwork frequently for understanding
- Conduct preview of content, concepts, and vocabulary
- Consider behavior management plan
- Implement accommodations/modifications as dictated in the student's IEP/504 plan
- Modified test content/format
- Modified written assignments
- Multi-sensory presentation
- Pre-annotate text
- Preferential seating
- Promote pair work
- Provide extended time on various assignments
- Provide printed/online copies of lesson notes
- Secure attention before providing instruction/directions
- Use assistive technology

English Language Learning (ELL)

- Use Teaching Tool 48 as a graphic organizer to help students connect a visual to the vocabulary term
- Use Teaching Tool 49 to connect students' understanding of vocabulary terms with actual meanings
- Use suggestions under English Language Learners section in Pearson Realize to target beginning, intermediate, and advanced learners e.g. Topic 8-1, pg. 455
- Use suggestions under Technology Center section in Pearson Realize to target ELLs
 - Allow for multiple student revisions
 - Allow for open-note / open-book assessments
 - Allow multiple forms of student products (projects, models, slide-shows, etc.) to demonstrate student learning
 - Ask and give information using key words
 - Demonstrate listening comprehension by responding to questions
 - Develop basic sight vocabulary
 - Differentiate assessments to reflect selected objectives
 - Express ideas in single words
 - Leverage computer spell checker
 - Modify reading assignments to correlate with lexile level
 - Peer tutoring / Peer note-taking
 - Speak using content area vocabulary in context
 - Teacher-created Study Guide
 - Use prior experiences to understanding meanings
 - Use videos, illustrations, pictures, and drawings to explain or clarify

At Risk

- Decrease the amount of work represented or required by assigning the "Do You Understand?" and the "Do You Know How?" sections of each lesson
- Use suggestions under Technology Center section in Pearson Realize to target at-risk students
- Use suggestions under Intervention Activity e.g. Topic 8-1, Error Intervention, pg. 457-458
 - Allow for multiple student revisions
 - Allow for open-note / open-book assessments
 - Allow multiple forms of student products (projects, models, slide-shows, etc.) to demonstrate student learning
 - Allow students to select from given assignment choices
 - Differentiate assessments to reflect selected objectives
 - Mark students' correct and acceptable work, not the mistakes
 - Peer tutoring / Peer note-taking
 - Promote student collaboration on in-class / outside class assignments

- Reduce lengthy outside reading assignments
- Teach key aspects of a topic - eliminate non-essential information
- Teacher-created Study Guide
- Use authentic assessments with real-life problem-solving
- Use videos, illustrations, pictures, and drawings to explain or clarify

Talented and Gifted Learning (T&G)

- Use suggestions under Extension for Early Finishers section in Pearson Realize to target advanced learners
- Use suggestions under Enrichment to target advanced learners e.g. Topic 8-1, pg. 454

- Administer Unit Assessment to determine level of proficiency
- Allow gifted children to create and publish a class newspaper to distribute
- Allow students to work at a faster pace
- Complete activities aligned with above grade-level text using Benchmark results
- Consider parental input about the education of their gifted children
- Create a blog or social media page about a topic of interest
- Create a plan to solve an issue presented in the class or in a text
- Debate issues with research to support arguments
- Involve students in academic contests
- Promote advanced problem-solving
- Remember that gifted children may not excel in all areas
- Set individual goals
- Utilize exploratory connections to higher-grade concepts
- Utilize project-based learning for greater depth of knowledge
