6-8.MS-ESS3-3.ESS3.C.1	Human activities have significantly altered the biosphere, sometimes damaging or destroying natural habitats and causing the extinction of other species. But changes to Earth's environments can have different impacts (negative and positive) for different living things.

6-8.MS-LS2-1.LS2.A.1	Organisms, and populations of organisms, are dependent on their environmental interactions both with other living things and with nonliving factors.
6-8.MS-LS2-1.LS2.A.2	In any ecosystem, organisms and populations with similar requirements for food, water, oxygen, or other resources may compete with each other for limited resources, access to which consequently constrains their growth and reproduction.
6-8.MS-PS2-3	Ask questions about data to determine the factors that affect the strength of electric and magnetic forces.
6-8.MS-PS2-2.7.1	Explanations of stability and change in natural or designed systems can be constructed by examining the changes over time and forces at different scales.
