Unit Overview

In Period 6, students will examine the rise of big business and its political, economic, and social impact on American society, the reasons for migration to cities and the consequences of a rapidly expanding population, and emerging problems that the United States faced and the reaction of different political parties to those issues.

Enduring Understanding

Chapter 17

- Many business leaders sought increased profits by consolidating corporations into large trusts and holding companies, which further concentrated wealth.
- Some argues that laissez-faire policies and competition promoted economic growth in the long run, and they opposed the government intervention during economic downturns.
- Social commentators advocated theories later described as Social Darwinism to justify the success of those at the top of the

socioeconomic structure as both appropriate and inevitable.

Chapter 18

- As the price of many goods decreased, workers' real wages increased, providing new access to a variety of goods and services; many Americans' standards of living improved, while the gap between the rich and poor grew.
- Urban neighborhoods based on particular ethnicities, races, and classes provided new cultural opportunities for city dwellers.
- In an urban atmosphere where the access to power was unequally distributed, political machines thrived, in part by providing immigrants and the poor with social services.

Chapter 19

- Businesses and foreign policymakers increasingly looked outside U.S. borders in an effort to gain greater influence and control over markets and natural resources in the Pacific Rim, Asia, and Latin America,
- Economic instability inspired agrarian activists to create the People's (Populist) Party, which called for a stronger governmental role in regulating the American economic system.
- The major political parties appealed to lingering divisions from the Civil War and contended over tariffs and currency issues, even as reformers argued that economic greed and self-interest had corrupted all levels of government.

Essential Questions

Chapter 17

- Analyze the economic, political, and social consequences of the rise of big business during the Gilded Age.
- Analyze the reasons for the growth of big business during Gilded Age.

Chapter 18

- Analyze the reasons for the growth of urban problems and the success of municipal governments in dealing with those problems.
- Analyze the continuities and changes in immigration patterns by the early twentieth century and the American response.
- Explain how the lure of the city influenced both internal and external migration patterns, leading to urbanization.

- Explain how urban planners proposed to physically alter the environment to improve the quality of life for urban residents.

Chapter 19

- To what degree and in what ways did government policy toward big business change in the late 19th century?
- Analyze the reasons for agrarian discontent in the late 19th century and evaluate the success for their efforts to resolve those issues.
- Explain the domestic and international consequences of the Panic of 1893.
