Students will also understand the steps of putting together a speech from start to performance

Enduring Understanding

- Nonverbal language can be a powerful force in delivering and interpreting the speaker's message.

- Feedback is an essential component of improvement of the quality of a speaker's thoughts and ideas.
- An analysis of well-known public speakers in history and political life can be an insightful and critical tool.
- Constructive criticism is important in maintaining respect and rapport between students in developing stronger speaking skills.
- Audience analysis provides the speaker with a pre-knowledge about the content of his or her speech.

Suggested Activities & Best Practices

- Students will bring two to three items from home that have some sort of value to them. Some items may have monetary value and some may have sentimental value. Students will get up in front of the class to present the information and begin the process of speaking in front of others. This should not be a formal type of speech but rather a conversation had among classmates.
- Students work in group of 3 -4 to research strategies to address fear of public speaking. After students have created an exhaustive list of strategies to address fear in public speaking, they work together to create a "Public Service" type of brochure and/or poster that is posted in the room throughout the semester.
