Unit Overview

In this unit, students will be able to independently demonstrate understanding of physics acting on a vehicle by designing and constructing a vehicle within constraints using appropriate hand machine tools. In addition, students will define Newton's first and second Laws of Motion and rotational inertia by completing acitivity sheet based on teacher presentation; apply the DECIDER design process to solve a given problem; pass the drill press safety test with 100% accuracy; and properly use the drill press by applying the principles observed in teacher demonstration and following safety test rules.

Enduring Understanding

Student will understand that...

- Physics acting on a vehicle affect vehicle performance
- Levers are a simple machine with different classes.

Essential Questions

- Why are Newton's Laws of Motion important?
- What role does physics play in the performance of a particular vehicle?
- What variables affect the performance of that vehicle?
- What is the drill press used for?
- Why is safety paramount when using the drill press?

Exit Skills

Students will know...

- Newton’s Laws of Motion
- The DECIDER design process
- Physics acting on mousetrap vehicle
- Major terms associated with vehicle Physics

LA.WHST.6-8.2.A	Introduce a topic and organize ideas, concepts, and information using text structures (e.g., definition, classification, comparison/contrast, cause/effect, etc.) and text features (e.g., headings, graphics, and multimedia) when useful to aiding comprehension.
LA.WHST.6-8.2.D	Use precise language and domain-specific vocabulary to inform about or explain the topic.
LA.WHST.6-8.6	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LA.WHST.6-8.7	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
