Suggested Activities & Best Practices

- Students will view an informative speech from past courses. They will view the speech and discuss what makes the speech an informative process, topic, event, or concept. If no past examples are available, the videos should be pulled from internet sources. Students will be able to differentiate between the types of informative speeches and determine which approach is best suited for a specific informative topic. Teacher may elect for the students to watch the videos at home and come back to class prepared to discuss.
- Using previously created topic note cards, students will pick a topic card and develop a hypothetical topic and main points and apply various methods of organization. They will summarize and defend their choices for the hypothetical situation in front of the class. The teacher could have students create a multimedia project to better explain the activity.
