Appendix Overview

This appendix is created to be aligned with Unit 4 of the HMH science curriculum and to be used as a guide into aquaponics

Students will.....

- investigate what an aquaponics system is
- describe and understand the function of different plants in an aquaponic system
- determine the role of fish and plants in the aqauponics tank

Enduring Understanding

Enduring understandings:

- Support the claim of what aquaponics is
- Understand the importance of an aquaponic tank and explain why
- Use models to explain the best plants for the tank and what they are used for
- Understand the different functions of plants and fish and why each are important

Essential Questions

- What is aquaponics?
- What plants are the best for the aquaponic system and what are their functions?
- How do fish and plants help each other in the tank?

Exit Skills

By the end of Grade 4, Aquaponics Appendix tasks, the student should be able to:

- understand and describe what an aquaponic system is
- identify and explain the different plants for an aquaponic tank and what they are used for

New Jersey Student Learning Standards (NJSLS-S & NGSS)

SEP - Engaging in Argument from Evidence

SEP - Analyzing and Interpreting Data

SEP - Asking Questions and Defining Problems

DCI - Structure and Function

CCC - Systems and System Models

CCC - Cause and Effect

4-ESS3-2.2.1	students routinely identify and test causal relationships and use these relationships to explain change. They understand events that occur together with regularity might or might not signify a cause and effect relationship.
4-ESS1-1.6	Constructing explanations and designing solutions in 3– 5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.
4-ESS1-1.6.1	Identify the evidence that supports particular points in an explanation.
4-ESS3-2.6.1	Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution.
4-ESS2-1.ESS2.E.1	Living things affect the physical characteristics of their regions.

4-LS1-1	Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.
4-LS1-1.7.1	Construct an argument with evidence, data, and/or a model.
4-LS1-1.LS1.A.1	Plants and animals have both internal and external structures that serve various functions in growth, survival, behavior, and reproduction.

Interdisciplinary Connections

MA.K-12.1	Make sense of problems and persevere in solving them.
MA.K-12.2	Reason abstractly and quantitatively.
MA.K-12.6	Attend to precision.
LA.W.4.1	Write opinion pieces on topics or texts, supporting a point of view with reasons and information.
LA.W.4.2.A	Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension.

Learning Objectives

Aquaponic task #1 - To learn what aquaponics is and why it is a valuable resource and tool

Aquaponic task #2 - To determine which fish species works best in the aquaponics tank based on water type, fish surivial, water tempature, eating habit and oxygen needs

- To determine which types of plants will grow best in the tank based on final use of plant, and time needed for plants to grow to maturity
