Creative, critical thinking, collaborative problems solving.

LA.RL.9-10.2	Determine a theme or central idea of a text and analyze in detail its development over the course of the text, including how it emerges and is shaped and refined by specific details and provide an objective summary of the text.
SOC.6.3.12.CS2	Analyze sources of prejudice and discrimination and propose solutions to eliminate them.

In situations like these, the models devised depend on a number of factors: How precise an answer do we want or need? What aspects of the situation do we most need to understand, control, or optimize? What resources of time and tools do we have? The range of models that we can create and analyze is also constrained by the limitations of our mathematical, statistical, and technical skills, and our ability to recognize significant variables and relationships among them. Diagrams of various kinds, spreadsheets and other technology, and algebra are powerful tools for understanding and solving problems drawn from different types of real-world situations.

Learning Objectives

1. Distinguish and utilize media.
2. Practice established procedures/techniques for using art media.
3. Distinguish ground-breaking uses of new mediums and experiment with new approaches to portraying positive and negative space in art installation or new media artwork.
4. Appraise how various artists and cultural resources influence our creative ability.
5. Clarify differentiated media.
6. Produce original works of art using art media and technique.
7. Compare and contrast innovative applications of art media and technique.
8. Differentiate between objective and subjective thoughts.
9. Interrelate proper use of vocabulary verbally and in written form.
10. Distinguish and describe works of art in terms of the use of the design principles and in written materials.
