Unit Overview

1. Discover the diversity in and connections among forms of artistic expression throughout history and from around the globe.
2. Learn how people have responded to and communicated their experiences through art making by exploring art in its historic and cultural contexts.
3. Welcome students into the global artworld as active participants, engaging with its forms and content as they research, discuss, read, write and create art and interpretations of art.
4. Explore areas such as wirework, cutting and forming metal with the development of deep conceptual understandings and skills.

Enduring Understanding

EU1 Creativity and innovative thinking are essential life skills that can be developed.

EU2 Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.

EU3 Artists and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.

EU4 Objects, artifacts, and artworks collected, preserved, or presented either by artists, museum, or other venues communicate meaning and a record of social, cultural, and political experiences resulting in the cultivating of appreciation and understanding.

EU5 Visual imagery influences understand of and responses to the world.

EU6 Through art making, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.

EU7 Textures on metal can be created by using various hammers and stamps, found objects and rolling mills.

EU8 Hot connections use a torch to solder metal together while cold connections do not and include techniques such as rivets, prongs, hinges, and wire wrapping.

EU9 Kinetic art is art that contains movement perceivable by the viewer or depends on motion for its effect.

EU10 Alexander Calder was the first to use wire to create three-dimensional line “drawings” of people, animals, and objects. These line sculptures introduced line into sculpture as an element unto itself.
