- Identify accounting processes involved in estimating, recording and writing off uncollectibles.
- Relate adjustments for uncollectible accounts to the Matching principal (matching revenue to expense)
- Ability to transfer principals of depreciation and book value to personal valuation of assets through their lives
- Apply concepts of inventory management to both, business and personal matters

Essential Questions

- What methods can be used to estimate an allowance for uncollectibles?
- What transactions are required to journalize uncollectible expense?
- How is Accounts Receivable affected by uncollectibles?
- Should a business reopen a customer account after it has paid an uncollectible?
- When cash is paid for equipment, what accounts are affected?
- What is real property?
- How is assessed value of plant assets calculated?
- When depreciation is recorded, which accounting concept is applied?
- How do we calculate a gain or loss on the sale of a plant asset?
- What are two methods utilized to depreciate assets?

Exit Skills

- Ability to realize and apply concepts and practices related to uncollectible accounts
- Understanding of post entries required in order to collecting and writing off uncollectible accounts receivable
- Ability to identify and apply accounting concepts and practices related to accounting for plant assets, depreciation and property tax
- Calculate book value and depreciation using straight-line and double-declining methods
