Unit Overview

Word isn't always the best program for creating documents. Here's a few ways that Publisher outshines its better-known sibling.

In many ways, Microsoft Office's Word and Publisher perform the same tasks. Both offer a way to combine text, images and formatting into a document. But while Word excels at typing long documents with a focus on the text, Publisher is a better tool for creating precisely designed publications such as booklets, pamphlets, business cards and greeting cards. Students will create these desktop publications in this unit.

Additionally students will work with video and sound in utilizing Advanced Powerpoint skills.

We will create a Prezi and show the similarities between powerpoint and at last we will create a presentation on Google slides.

Enduring Understanding

Enduring Understandings

Students will:

1. recognize the power of visual stimulation in advertisement through desktop design
2. understand, appreciate, evaluate and implement features and elements of desktop publishing
3. learn and understand how to apply elements of desktop publishing applications

This unit also introduces the student to elements of a presentation. It is important to understand how a visually-supported presentation can effectively enhance the message presented to an audience.

Enduring Understandings

The students will:

1. build on their knowledge and skills in designing an effective presentation
2. improve public speaking skills by presenting PowerPoint project to peers
3. provide graphic elements of presentation

Essential Questions

1. How can we increase the effectiveness of an oral presentation through visual stimulation?
2. How can we use visual and written elements effectively and efficiently to reach a target audience?

Exit Skills

Create a PowerPoint Presentation. Performance will be satisfactory when:

- o learner identifies parts of the PowerPoint window.
- o learner creates, views, and edits a PowerPoint presentation.
- o learner formats a presentation including changing fonts, applying styles and bullets.
- o learner inserts and formats pictures and shapes.
- o learner inserts and formats tables.
- o learner inserts and formats charts.
- o learner applies slide transitions.
- o learner uses animation schemes.
- o learner sets effect and timing options.
- o learner prints PowerPoint slides, handouts, notes, outline.

Students will create:

Brochures, catalogs, newsletters, flyers and greeting cards can be made using **Microsoft Publisher application.**

Students will also create:

A Prezi which gives you unprecedented visual storytelling power, combining the freedom of an open canvas with spatial dimension and motion to keep audiences engaged as you guide them through your message.
