### **Unit Overview**

---

In this unit students will analyze police systems in America. Students will study federal, state, county and municipal police agencies. Students will explore the functions of the police, the major responsibilities of police, and the factors shaping police work. Students will study and apply police strategies to prevent and resolve crime. Students will analyze police use of deadly force and instances of police brutality. Students will review eEfforts to prevent excessive use of force by police.

### **Enduring Understanding**

---

The myth of police as crime-fighters has been conveyed to the American people through movies, television dramas, comic strips, and newspaper articles. It conjures up in one's mind an image of a police officer doing a dangerous job that requires him or her to outshoot, outpunch, and outwit dangerous criminals. For most American police, there is little correspondence between this image and reality. In a major metropolitan area (where crime rates are the highest), half of the officers in the local department will not make a felony arrest during a given year. The total annual rate of

weapon discharges per hundred police officers is in the range of two to six. Students will realize the responsibilities of police include identifying criminal offenders and criminal activity and, when appropriate, to apprehend offenders and participate in later court proceedings. Police also are responsible for reducing the opportunities for the commission of some crimes through preventive patrol and other measures and to aid individuals who are in danger of physical harm. In our society, people rely on the police to protect constitutional guarantees, to facilitate the movement of people and vehicles, to assist those who cannot care for themselves, to resolve conflict, to identify problems that are potentially serious law enforcement or government problems, to create and maintain a feeling of security in the community, to promote and preserve civil order.
