Cybersecurity

Department of Curriculum and Instruction

Belleville Public Schools

Curriculum Guide

Introduction to Python Computer Programming, Grades 9-12

Cybersecurity Unit

Belleville Board of Education

102 Passaic Avenue

Belleville, NJ 07109

Prepared by: Teacher, Corey Woodring

Dr. Richard Tomko, Ph.D., M.J., Superintendent of Schools

Ms. LucyAnn Demikoff, Director of Curriculum and Instruction K-12

Ms. Nicole Shanklin, Director of Elementary Education

Mr. Joseph Lepo, Director of Secondary Education

Board Approved:

Unit Overview

Cybersecurity explores the state of cybersecurity in the past, present, and future. Students will explore careers in Cybersecurity, learn about security threats, cryptography, network fundamentals, and defensive tools, as well as weighing legal and ethical considerations. Learn how attacks take place, and how to combat them by participating in hacking competitions

Enduring Understanding

● In order to stay safe we must understand how to limit our digital footprint and prevent tracking information that leaves us open to potential attacks.

● Government officials on a local and national level are constantly revising laws to meet the ongoing changes of our cyber society.

● Cybersecurity practices are highly complex and variable causing tensions between what the ethical duties are, to whom the ethical concern should be considered

Computer systems and networks are used to transfer data around the world.

● We must implement protection measures to secure computers and devices on a network in order to stay safe in a digital age.

● The Internet is a large, globally distributed network that is divided into layers, governed by protocols, and connects a wide variety of devices.

● Cyber terrorism has an ongoing rolling impact on a societies emotional, physical and financial well-being.

Essential Questions

● What does cybersecurity encompass?

● How is intellectual property affected by cyber security?

● Describe the ethical challenges created by digital technology?

● How can you limit your digital footprint online and offline?

● What steps could be taken nationally to prevent either an act of terrorism or the escalation of a terrorist situation?

● How are confidentiality, integrity, and availability interconnected?

● What are the ways in which data can be encrypted?

● How is the integrity of data being transported over networks safeguarded?

● How would cybersecurity specialists find incriminating information on a terrorist?

● How do forensics and digital forensics differ?

What are the underlying motivations for cyber terrorisim?

● What factors may contribute to a group resorting to terrorism and/or cyberterrorism?

● What steps would you take to prevent either an act of terrorism or the escalation of terrorist situation?

● When do you think hacking, and other cyber crimes cross the line to be called cyber terrorism?

Exit Skills

● Students will understand how the role of values and ethics affects political structures, laws, and policy decisions as it relates to cybersecurity.

● Students will develop a logical argument advocating safe/secure internet decisions in response to a presented vignette.

- Recommend or create a cost efficient cyber security plan.

● Students will be able to describe how to prevent or minimize malware attacks.

● Students will describe the process of developing secure hardware and validating that it is secure through its lifecycle.

New Jersey Student Learning Standards (NJSLS-S)

● 9.3.IT.6 - Describe trends in emerging and evolving computer technologies and their influence on IT practices.

● 9.3.IT.8 - Recognize and analyze potential IT security threats to develop and maintain security requirements.

● 9.3.IT.10 Describe the use of computer forensics to prevent and solve information technology crimes

and security breaches

● 8.1.12.D.2 - Evaluate consequences of unauthorized electronic access (e.g., hacking) and disclosure, and on dissemination of personal information

TECH.8.1.12.E.1	Produce a position statement about a real world problem by developing a systematic plan of investigation with peers and experts synthesizing information from multiple sources.
TECH.8.1.12.E.2	Research and evaluate the impact on society of the unethical use of digital tools and present your research to peers.
TECH.8.1.12.F	Critical thinking, problem solving, and decision making: Students use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
TECH.8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
TECH.8.2.12	Technology Education, Engineering, Design, and Computational Thinking - Programming: All students will develop an understanding of the nature and impact of technology, engineering, technological design, computational thinking and the designed world as they relate to the individual, global society, and the environment.

Interdisciplinary Connections

● W.9-10.3. Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences. ● RH.9-10.4. Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social studies. Computer Science and Design Thinking Standards: ● 8.1.12.D.2. Evaluate consequences of unauthorized electronic access (e.g., hacking) and disclosure, and on dissemination of personal information ● 8.1.12.D.5. Analyze the capabilities and limitations of current and emerging technology resources and assess their ELA Standards: ● RST.9-10.8. Assess the extent to which the reasoning and evidence in a text support the author's claim or a recommendation for solving a scientific or technical problem. Computer Science and Design Thinking Standards: ● 8.1.12.D.5. Analyze the capabilities and limitations of current and emerging technology resources and assess their potential to address personal, social, lifelong learning, and career needs. (Students will examine a security program and conduct online research to see if the features protect the users or if the programs have obvious flaws in the programming) ELA Standards: ● RI.11-12.4. Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze how an author uses and refines the meaning of a key term or terms over the course of a text (e.g., how Madison defines faction in Federalist No. 10). ● RI.11-12.7 - Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem. Computer Science and Design Thinking Standards: ● 8.1.12.D.2. Evaluate consequences of unauthorized electronic access (e.g., hacking) and disclosure, and on ELA Standards: ● RL.9-10.1. Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. ● W.9-10.3. Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences. Computer Science and Design Thinking Standards: ● 8.1.12.E.1 - Produce a position statement about a real world problem by developing a systematic plan of investigation with peers and experts synthesizing information from multiple sources. (Students will be given fragmentary and incomplete information about a terrorist attack, and must come up with a Somerville Public Schools Scope, Sequence, and Pacing Guide potential to address personal, social, lifelong learning, and career needs. ● 8.1.12.E.2. Research and evaluate the impact on society of the unethical use of digital tools and present your research to peers. ● 8.1.12.F.1. Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs. (Students will create a presentation on how they think the Bill of Rights includes or excludes online privacy) dissemination of personal information. ● 8.1.12.E.1. Produce a position statement about a real world problem by developing a systematic plan of investigation with peers and experts synthesizing information from multiple sources. ● 8.1.12.D.2. Evaluate consequences of unauthorized electronic access (e.g., hacking) and disclosure, and on dissemination

of personal information.

8.1.12.NI.2	Evaluate security measures to address various common security threats.
JU.9-12.12	I can recognize, describe and distinguish unfairness and injustice at different levels of society.
8.2.12.EC.2	Assess the positive and negative impacts of emerging technologies on developing countries and evaluate how individuals, non-profit organizations, and governments have responded.
8.2.12.EC.3	Synthesize data, analyze trends, and draw conclusions regarding the effect of a technology on the individual, culture, society, and environment and share this information with the appropriate audience.
8.2.12.ETW.4	Research historical tensions between environmental and economic considerations as driven by human needs and wants in the development of a technological product and present the competing viewpoints.
CAEP.9.2.12.C.1	Review career goals and determine steps necessary for attainment.

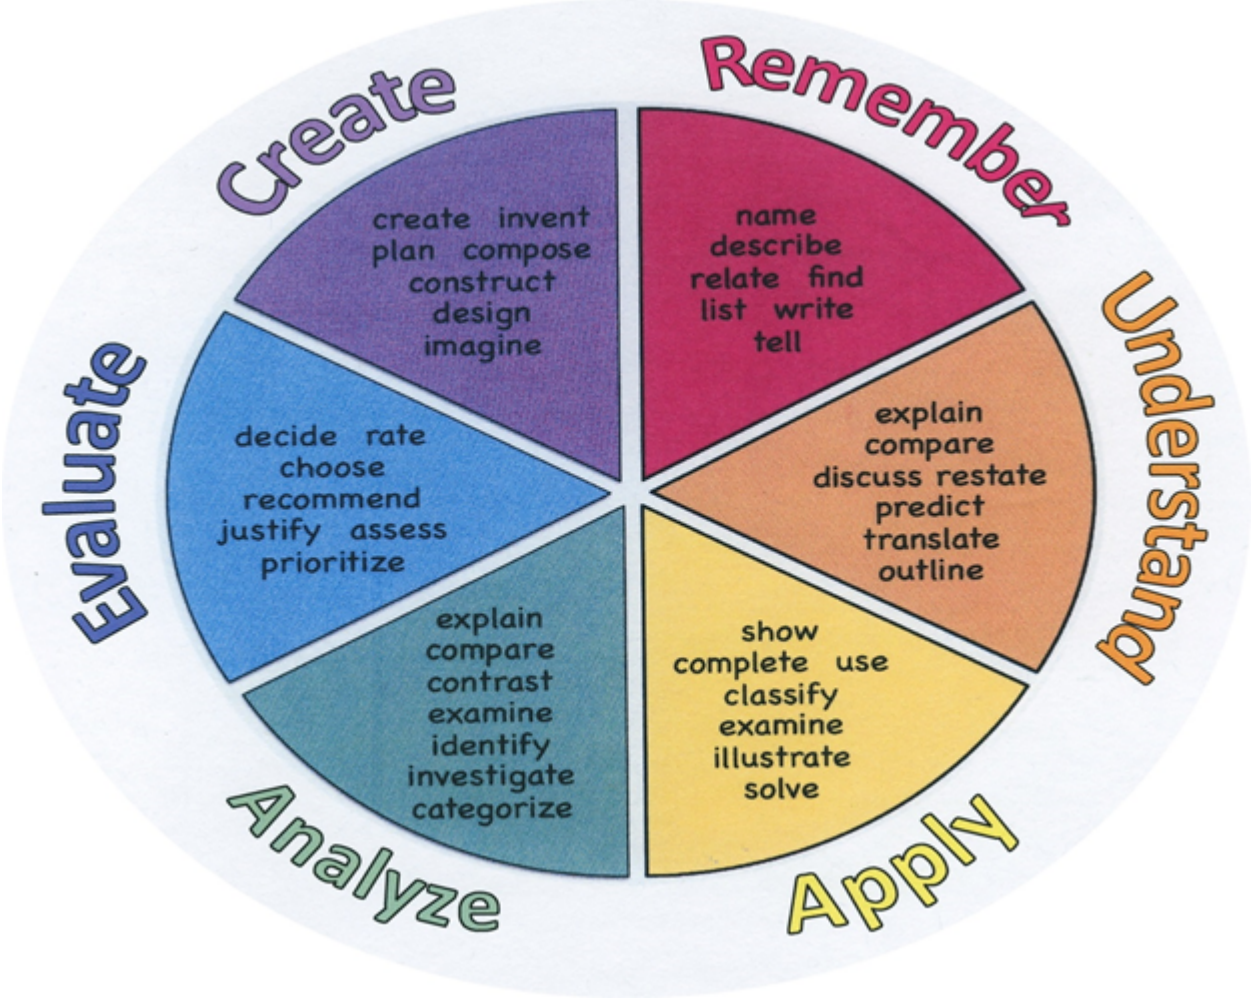

Learning Objectives

The educational objectives of the unit are:

- **To prepare students with the technical knowledge and skills needed to protect and defend computer systems and networks.**
- **To develop students that can plan, implement, and monitor cyber security mechanisms to help ensure the protection of information technology assets.**
- **To develop students that can identify, analyze, and remediate computer security breaches.**

Suggested Activities & Best Practices

PBL Name: Cyber Security Briefings Goal: The purpose of this module is to place students in the drivers' seat as a Department of Homeland Security (DHS) investigative team. Students are immersed in a "real-world" scenario, given fragmentary and incomplete information, and are tasked with coming up with a workable solution to a complex problem

Role: Department of Homeland Security Investigators Audience: Department of Human Services Scenario: There are several scenarios to utilize for this project. Depending on the interests of the students. These scenarios are designed to be an immersive game experience, with students taking an active role as investigators. Although each scenario does have one solution, students must come to their own conclusions based upon their interpretation of the evidence. In other words, solving the riddle is not the primary purpose of these scenarios. Instead, students must use their critical thinking, puzzle solving, evidence gathering, and communication skills— all while working as a team—to make an assessment of the situation and a compelling argument for a course of action. Product: Each team must prepare a presentation that tells the Department of Homeland Security (DHS) their assessment of the cyber security briefing they were given to analyze. Students must craft a government response using evidence from the documents and to make their argument. Students are free to use: ● Oral presentation ● Google slideshow/Prezi ● Video ● Google Draw PBL Resources: https://nicerc.instructure.com/co urses/6/pages/media-literacy Standards: 9.3.IT.10

● CSUnplugged ● Gencyber ● Formal Education ● Cyber Society Curriculum, Cyber Curriculum, Cyber Lessons ● National Cryptologic Museum Foundation ● CodeHS

Assessment Evidence - Checking for Understanding (CFU)

Assess students' understanding of the material and development of new skills.
Students will be given cybersecurity simulations to work through and be assessed and checked for students understanding.

- Admit Tickets
- Anticipation Guide

- Compare & Contrast
- Create a Multimedia Poster
- DBQ's
- Define
- Describe
- Evaluate
- Evaluation rubrics
- Exit Tickets
- Explaining
- Fist- to-Five or Thumb-Ometer
- Illustration
- Journals
- KWL Chart
- Learning Center Activities
- Multimedia Reports
- Newspaper Headline
- Outline
- Question Stems
- Quickwrite
- Quizzes
- Red Light, Green Light
- Self- assessments
- Socratic Seminar
- Study Guide
- Surveys
- Teacher Observation Checklist
- Think, Pair, Share
- Think, Write, Pair, Share
- Top 10 List
- Unit review/Test prep
- Unit tests
- Web-Based Assessments
- Written Reports

Alignment to 21st Century Skills & Technology

Mastery and infusion of **21st Century Skills & Technology** and their Alignment to the core content areas is essential to student learning. The core content areas include:

- English Language Arts;
- Mathematics;
- Science and Scientific Inquiry (Next Generation);
- Social Studies, including American History, World History, Geography, Government and Civics, and Economics;
- World languages;
- Technology;
- Visual and Performing Arts.

CAEP.9.2.12.C	Career Preparation
CAEP.9.2.12.C.1	Review career goals and determine steps necessary for attainment.
CAEP.9.2.12.C.2	Modify Personalized Student Learning Plans to support declared career goals.

21st Century Skills/Interdisciplinary Themes

- Communication and Collaboration
- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Information Literacy
- Life and Career Skills
- Media Literacy

9-12.HS-ETS1-1.1	Asking Questions and Defining Problems
9-12.HS-ETS1-1.1.1	Analyze complex real-world problems by specifying criteria and constraints for successful solutions.
	Connections to Expressions, Equations, Modeling, and Coordinates.
	Functions

21st Century Skills

Upon completion of this section, please remove all remaining descriptions, notes, outlines, examples and/or illustrations that are not needed or used.

Please list only the **21st Century Skills** that will be incorporated into this unit.

- Civic Literacy
- Environmental Literacy
- Financial, Economic, Business and Entrepreneurial Literacy
- Global Awareness
- Health Literacy

SCI.HS Engineering Design

Differentiation

- Show students how to find the hints, methods reference cards, error messages, and sample code provided within each level.
- Students struggling with a given level will be automatically directed to additional practice levels within the game.

- Meeting with small groups to re-teach an idea or skill for struggling learners, or to extend the thinking or skills of advanced learners.

  . Varying the length of time a student may take to complete a task in order to provide additional support for a struggling learner or to encourage an advanced learner to pursue a topic in greater depth.

  Using rubrics that match and extend students' varied skills levels

Differentiations:

- Small group instruction
- Small group assignments
- Extra time to complete assignments
- Pairing oral instruction with visuals
- Repeat directions
- Use manipulatives
- Center-based instruction
- Token economy
- Study guides
- Teacher reads assessments allowed
- Scheduled breaks
- Rephrase written directions
- Multisensory approaches
- Additional time
- Preview vocabulary
- Preview content & concepts
- Story guides
- Behavior management plan

- Highlight text
- Student(s) work with assigned partner
- Visual presentation
- Assistive technology
- Auditory presentations
- Large print edition
- Dictation to scribe
- Small group setting

Hi-Prep Differentiations:

- Alternative formative and summative assessments
- Choice boards
- Games and tournaments
- Group investigations
- Guided Reading
- Independent research and projects
- Interest groups
- Learning contracts
- Leveled rubrics
- Literature circles
- Multiple intelligence options
- Multiple texts
- Personal agendas
- Project-based learning
- Problem-based learning
- Stations/centers
- Think-Tac-Toes
- Tiered activities/assignments
- Tiered products
- Varying organizers for instructions

Lo-Prep Differentiations

- Choice of books or activities
- Cubing activities
- Exploration by interest
- Flexible grouping
- Goal setting with students
- Jigsaw
- Mini workshops to re-teach or extend skills
- Open-ended activities
- Think-Pair-Share
- Reading buddies
- Varied journal prompts
- Varied supplemental materials

Special Education Learning (IEP's & 504's)

- If students struggle with breaking down problems, you can use the printable Engineering Cycle Worksheet to reinforce a step-by-step problem-solving approach.
- If students struggle to follow correct syntax, provide a copy of the printable Python Syntax Guide or JavaScript Syntax Guide

IEP:

1. Adherence to the students' Individualized Learning Plan.
2. Students will have extra time or fewer assignments, one-to-one assistance, and group work will often be enlisted.
3. Students may use speech-to-text or audio/video record assignments
4. Teacher may adapt learning style to fit the needs of the child.
5. Teacher will use graphic organizer to visually help students plan out their work.
6. The teacher will scaffold the lesson with a slow release from assisted support with guided practice to independent practice.
7. Front-loaded notes to enable students to more accurately follow along with teacher's instruction.
8. Step-by-step directions written out for students.

504:

1. Any necessary accommodations will be made as outlined in students' 504 plan.
2. Preferential seating while teacher is lecturing, explaining, etc.
3. Extended time on projects or assessments.
4. Verbal, visual or technology aids.
5. Use of digital audio-visual materials, such as YouTube, to assist the child with directions.
6. Students will have access to "How To" videos, so they may more easily follow along with directions for their assignments.

- printed copy of board work/notes provided
- additional time for skill mastery
- assistive technology
- behavior management plan
- Center-Based Instruction
- check work frequently for understanding
- computer or electronic device utilizes
- extended time on tests/ quizzes
- have student repeat directions to check for understanding
- highlighted text visual presentation
- modified assignment format

- modified test content
- modified test format
- modified test length
- multi-sensory presentation
- multiple test sessions
- preferential seating
- preview of content, concepts, and vocabulary
- Provide modifications as dictated in the student's IEP/504 plan
- reduced/shortened reading assignments
- Reduced/shortened written assignments
- secure attention before giving instruction/directions
- shortened assignments
- student working with an assigned partner
- teacher initiated weekly assignment sheet
- Use open book, study guides, test prototypes

English Language Learning (ELL)

Advance notes

One way that we can make things easier is by preparing and distributing advance notes. This gives ELLs the opportunity to preview what will be taught and, in turn, aids in comprehension of the material.

eDictionaries

When used correctly, technology never fails to transform a classroom. Allow your students to use eDictionaries in your classroom to look up unknown words. Any regular dictionary will do, but eDictionaries allow students to hear the pronunciations of words. As you might imagine, this is extremely helpful for anyone learning a second language. If students encounter an unknown word, they can type it into an eDictionary, hear the word pronounced and either read or listen to the definition. Also, if they aren't sure how to to spell a word, many eDictionaries will allow them to speak the word to have the correct spelling displayed.

Please identify the **English Language Learning** adaptations that will be employed in the unit, using the ones identified below.

- teaching key aspects of a topic. Eliminate nonessential information
- using videos, illustrations, pictures, and drawings to explain or clarif

- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning;
- allowing students to correct errors (looking for understanding)
- allowing the use of note cards or open-book during testing
- decreasing the amount of workpresented or required
- having peers take notes or providing a copy of the teacher's notes
- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using computer word processing spell check and grammar check features
- using true/false, matching, or fill in the blank tests in lieu of essay tests

At Risk

Directions or Instructions

Make sure directions and/or instructions are given in limited numbers. Give directions/instructions verbally and in simple written format. Ask students to repeat the instructions or directions to ensure understanding occurs. Check back with the student to ensure he/she hasn't forgotten. It is a rare event for students at risk to be able to remember more than 3 things at once. Chunk your information, when 2 things are done, move to the next two.

A Strategy Summary

Planned interventions are far superior to remediation approaches. Always plan to address students at risk in your learning tasks, instructions, and directions. Try to anticipate where the needs will be and then address them. Intervene as much as possible to support students at risk. If your intervention strategies are working, continue to use them. If they're not working, plan for new interventions that will help students succeed.

Intervention Strategies that will be employed in the unit, using the ones identified below.

- allowing students to correct errors (looking for understanding)
- teaching key aspects of a topic. Eliminate nonessential information
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning
- allowing students to select from given choices
- allowing the use of note cards or open-book during testing
- collaborating (general education teacher and specialist) to modify vocabulary, omit or modify items to

reflect objectives for the student, eliminate sections of the test, and determine how the grade will be determined prior to giving the test.

- decreasing the amount of workpresented or required
- having peers take notes or providing a copy of the teacher's notes
- marking students' correct and acceptable work, not the mistakes
- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using authentic assessments with real-life problem-solving
- using true/false, matching, or fill in the blank tests in lieu of essay tests
- using videos, illustrations, pictures, and drawings to explain or clarify

Talented and Gifted Learning (T&G)

http://www.grandviewlibrary.org/CurriculumAdaptations/General_Gifted.pdf

Grouping • Group gifted students with other gifted students or higher-level learners. • Refrain from grouping gifted students with lower-level students for remediation.

Talented and Gifted adaptations that will be employed in the unit, using the ones identified below.

- Above grade level placement option for qualified students
- Advanced problem-solving
- Allow students to work at a faster pace
- Cluster grouping
- Complete activities aligned with above grade level text using Benchmark results
- Create a blog or social media page about their unit
- Create a plan to solve an issue presented in the class or in a text
- Debate issues with research to support arguments
- Flexible skill grouping within a class or across grade level for rigor
- Higher order, critical & creative thinking skills, and discovery
- Multi-disciplinary unit and/or project
- Teacher-selected instructional strategies that are focused to provide challenge, engagement, and growth opportunities
- Utilize exploratory connections to higher-grade concepts
- Utilize project-based learning for greater depth of knowledge

Sample Lesson

Cyber security threats Lesson plan and printable activities Materials needed 1. 3.6.1 Lesson PowerPoint. 2. Starter activity cards. 3. Cyber security threat worksheet. Starter activity (~5 minutes) 1. Slide 2: Activity – Silent card sort Students are divided into pairs – cards should be cut up before hand. In silence they should rearrange the words into the correct order to create a definition of cyber security. Differentiation: Students could be given the start of the definition or part of the sentence and fill in the missing words as an easier alternative. Extension: If students finish early, get them to mind map ideas they have for cyber security threats. 2. Slide 3: Answer to silent card sort. 3. Slide 4: Discussion and questions leading into the topic. Main activities 1. Slide 5: Introduction to the objectives of the lesson. Slide 6: Cyber security threats that students need to know about are listed. There is a break down of the threats in the notes section of the PowerPoint, with some supporting links. Alternatives: Depending on ability of class, the teacher may wish to discuss the threats with the class, or get them to independently research them – completing the Cyber security threats worksheet on slide 10. They may also complete aspects of it during the activity on slide 8. 2. Slide 7: Video on cyber security www.youtube.com/watch?v=sdpxddDzXfE 3. Slide 8: Link to a game about cyber security following on from the video. www.pbs.org/wgbh/nova/labs/lab/cyber/ Assessment opportunity: Differentiated levels to work through in the interactive game. Gives an example of defending a company against cyber criminals and attacks. Students can log in to this site, so it is possible for them to work further on it at home/ outside of the lesson if so desired.3.6 Fundamentals of cyber security Page 2 of 6 non-confidential © 2016 AQA. Created by Teachit for AQA 4. Slide 9: Information on penetration testing. 5. Slide 10: Cyber security threats worksheet Depending on class ability and teacher preference, students can record findings from the game – as stated above, it could be introduced at slide 6, or they could research and complete independently. Alternative: the worksheet could be completed as a homework task to consolidate the learning. Plenary (5 minutes) 1. Slide 11: Activity - 3,2,1 This can be done in groups or individually: Identify: 3 categories of cyber security threats 2 examples of cyber security threats 1 reason for penetration testing.3.6 Fundamentals of cyber security Page 3 of 6 non-confidential © 2016 AQA. Created by Teachit for AQA Lesson3.6 Fundamentals of cyber security Page 4 of 6 non-confidential © 2016 AQA. Created by Teachit for AQA3.6 Fundamentals of cyber security Page 5 of 6 non-confidential © 2016 AQA. Created by Teachit for AQA Starter activity cards Protecting networks, computers, programs and data from attack, damage or unauthorised access through the use of technologies processes and practices.3.6 Fundamentals of cyber security Page 6 of 6 non-confidential © 2016 AQA.
