- Automaticity in language processing is reflected in the ability to identify and act on significant information from a variety of genres and registers.
- English language learners' strategic competence in processing academic language facilitates their access to content area concepts and ideas.
- Read and distinguish between explicit, inferential, and uncertain evidence using adapted text, graphic organizers (i.e. T-chart), and L1 support. Read and analyze how two or more themes develop using graphic organizers, visual representations, and L1 support.

### Suggested Activities & Best Practices

**Student Centered Learning:** Students should either have already selected groups or groups of their choosing and be ready to

answer higher order thinking discussion questions related to the theme or topic of the piece of literature being discussed.

**Use of Rubrics:** After discussing an assignment, allow students to create what they believe to be a fair rubric for assessing the assignment. Language comprehension and writing abilities will be used in creating rubrics. This allows the students to have a say in how they will be graded as well as accountability for the assignment.

**Allowing students to choose their own projects:** Having a variety of projects that the students can choose from helps address all learning types. This will allow the students to choose the project they feel they can be most successful in completing.

**Brainstorming:** This helps in the writing process because it will allow the student to know if they are grasping the topic. Brainstorm ideas utilizing the language acquisition skills.

**Google Translate:** Students should be allowed to utilize Google translate when unfamiliar with terms, expressions and unfamiliar vocabulary.
