Suggested Activities & Best Practices

Example: Students will read in groups and answer thematic questions for the passage. The groups will then share their work with the rest of the class and a whole group discussion will take place in response to the presentation.

Student Centered Learning: Students should either have already selected groups or groups of their choosing and we ready to jigsaw or answer higher order thinking discussion questions related to the theme or topic of the piece of literature being discussed.

Use of Rubrics: After discussing an assignment, allow students to create what they believe to be a fair rubric for assessing the

assignment. This allows the students to have a say in how they will be graded as well as accountability for the assignment.

Starting classes with a "Do Now" activity: Using a connection to life question that relates to the piece of literature will make the students be able to connect to the text and jump start to discussion.

Allowing students to choose their own projects: Having a variety of projects that the students can choose from helps address all learning types. This will allow the students to choose the project they feel they can be most successful in completing.

Brainstorming: This helps in the writing process because it will allow the student to know if they are grasping the topic., allowing for language development to continue to expand.

Assessment Evidence - Checking for Understanding (CFU)

Example: The students will take a multiple choice test on Pearson that provides higher order thinking questions on "Rules of a Game" from Joy Luck Club by Amy Tan.
