Board Approved: September 23, 2019

## **Unit Overview**

---

This unit is about solving and graphing inequalities and compound inequalities.

The students should learn how to solve inequalities using different methods, graph their solution sets on number line, identify and solve compound inequalities.

## **Enduring Understanding**

---

The solution to an inequality is a set, not just a single solution.

Make sense of problems and persevere in solving them.

Reason abstractly and quantitatively.

Model with mathematics.

Attend to precision.

Look for and make use of structure.

Look for and express regularity in repeated reasoning.

## Essential Questions

---

- How do you represent relationships between quantities that are not equal?
- How do you justify the solution to a linear inequality?
- Can inequalities that appear to be different be equivalent?
- How can you solve inequalities?
- How to distinguish between to types of inequalities: unions and intersection?
- What are real-life applications of inequalities?

## Exit Skills

---

By the end of Unit 2 Students Should be able to:

- Write, graph, and identify solutions of inequalities.
- Solve inequalities using addition or subtraction.
- Solve inequalities using multiplication or division.
- Solve multi-step inequalities involving the distributive property.
- To solve inequalities with coefficients represented by letters.
- Graph linear inequalities on the coordinate plane.
- Identify compound statements connected by the word and/or.
- Solve compound inequalities containing the word and/or and graph their solution set.
- Model real world problems using inequalities.

MA.K-12.1	Make sense of problems and persevere in solving them.
MA.K-12.3	Construct viable arguments and critique the reasoning of others.
MA.K-12.4	Model with mathematics.
MA.K-12.5	Use appropriate tools strategically.
MA.K-12.6	Attend to precision.
MA.A-CED.A.1	Create equations and inequalities in one variable and use them to solve problems.
MA.A-REI.B	Solve equations and inequalities in one variable
MA.A-REI.B.3	Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.

## Interdisciplinary Connections

---

LA.W.9-10.1	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.
LA.L.9-10.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
9.3.12.FN.1	Utilize mathematical concepts, skills and problem solving to obtain necessary information for decision making in the finance industry.
9-12.HS-PS1-4.2.1	Develop a model based on evidence to illustrate the relationships between systems or between components of a system.
9-12.HS-PS1-3.3	Planning and Carrying Out Investigations
9-12.HS-PS2-4.5	Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

## Learning Objectives

---

Students will be able to:

- Represent relationship algebraically and evaluate them using properties.
- Interpret real-world examples into linear inequalities .
- Solve one-step inequalities in one variable using different operations.
- Solve multi-step inequalities and justify each step using properties.
- Solve inequalities with the variables on both sides by using like terms and the distributive property.
- Identify inequalities that are unions and intersections by analyzing the signs of inequalities.
- Graph solution sets on the number line using number theory .
- Solve inequalities by graphing.
- Investigate the graphs of inequalities by using a graphing calculator.
- Analyze the difference between the words phrases "at least" and " the most" and be able to use their symbols in inequalities.
- Model real-world situations using inequalities.

- Investigate and extend classroom activities into self research and long term projects.

Teaching Algebra with Manipulatives

- teaching key aspects of a topic. Eliminate nonessential information
- using videos, illustrations, pictures, and drawings to explain or clarify
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning;
- allowing students to correct errors (looking for understanding)
- allowing the use of note cards or open-book during testing
- decreasing the amount of work presented or required
- having peers take notes or providing a copy of the teacher's notes
- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using computer word processing spell check and grammar check features
- using true/false, matching, or fill in the blank tests in lieu of essay tests

Enrichment: Solving Compound Inequalities (5-4)

- Above grade level placement option for qualified students
- Advanced problem-solving
- Allow students to work at a faster pace
- Cluster grouping
- Complete activities aligned with above grade level text using Benchmark results
- Create a blog or social media page about their unit
- Create a plan to solve an issue presented in the class or in a text

- Debate issues with research to support arguments
- Flexible skill grouping within a class or across grade level for rigor
- Higher order, critical & creative thinking skills, and discovery
- Multi-disciplinary unit and/or project
- Teacher-selected instructional strategies that are focused to provide challenge, engagement, and growth opportunities
- Utilize exploratory connections to higher-grade concepts
- Utilize project-based learning for greater depth of knowledge

## Sample Lesson

---

Unit Name: Linear Equations

NJSLS:

MA.9-12.A-REI.A.1 Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.

MA.9-12.A-REI.B.3 Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.

Statement of Objective: After reviewing the Do Now and HW the learner will solve equations with one variable by combining like terms and using the distributive property to show whether there is one, none, or infinitely many solutions

Learning Activity:

Anticipatory Set/Do Now: 5 minute check - [https://catalog.mcgraw-hill.com/repository/private\\_data/DOC/50000178/67/56.pdf](https://catalog.mcgraw-hill.com/repository/private_data/DOC/50000178/67/56.pdf)

Distribute graphic organizer with steps to Solving multi-step equations ( Suggested Activities & Best Practices)

Ask questions to discern understanding of distributive property, combining like terms, and inverse operations.....first? next? ... How can we check our answer? - Model with Algebra tiles or digital tiles

Model Problems on Smart TV :

Powerpoint(<https://connected.mcgraw-hill.com/c2j/resourceLibrary.do?facet=GROUP%7cN&facet=TAG%7cBBW9KBBEFF7MXHDNLPLD2YQZSE&bookId=DFRTR2RBH9YT25W7OSMM6J3XM1&libraryId=Z6G2OY1GBWQ6VGCOF13O5Z16LO&mode=BROWSE>)

Discuss no solutions to an equation? infinitely many solutions to an equation?

Practice with their partner/group -think/pair/share

Have students go to board or post to show and explain their work and answer
