Unit 4, Circles, Area & Volume Copied from: Geometry H, Copied on: 02/21/22

Content Area: **Math**
Course(s): **Geometry H**
Time Period: **MayJun**
Length: **45 Days, Grade 9,10**
Status: **Published**

Title Section

Department of Curriculum and Instruction

Belleville Public Schools

Curriculum Guide

Geometry H, Grade 9,10

CIrcles, Area & Volume

Belleville Board of Education

102 Passaic Avenue

Belleville, NJ 07109

Prepared by: Annamaria Contella

Board Approved:September 23, 2019

Unit Overview

Students will explore and apply properties of circles as well as prove theorems dealing with tangents, secants, radians, arc lengths, and inscribed angles. Area and perimeter will be revisited and used to find areas and perimeters of irregular shapes as well as prove and apply properties of areas.

Enduring Understanding

Students will understand

the relationship between geometry and real life situations.

the different components of circles and how they relate to angle measurements.

that all circles are similar.

that angles inscribed on a diameter are right angles.

that the length of the arc intercepted by an angle is proportional to the radius.

that angles have properties in quadrilaterals inscribed in a circle.

the relationship between algebra and coordinate geometry.

that volume formulas can be used for cylinders, pyramids, cones, and spheres.

that 2-D and 3-D objects can be used to identify one another.

that Geometry helps us to understand the structure of space and the spatial relations around us

Essential Questions

What is the difference between a chord and a diameter of a circle?

How does the type of arc relate to its degree measure?

Through what point does a perpendicular bisector of a chord pass?

What is the relationship between the measure of an inscribed angle and the measure of its intercepted arc?

Why would two segments be congruent if they have a common endpoint and both are tangent to a circle?

What is the difference between chords and secants?

How is finding the measures of two chords that intersect inside a circle different from finding the measures of two chords that intersect outside the circle?

How would you write an equation for a circle, if you were given the diameter and the equations of the two tangent lines?

What is area and how do we find area of polygons and composite figures?

What is the difference between perimeter and area of polygons?

How can the coordinate plane and use of the distance formula be used to find area of polygons?

How do we find area of regular polygons?

What is the difference between circumference and area of circles?

What is geometric probability and how can area be used to find probabilities?

How are cross-sections of solids examined?

How do we find surface area of prisms, cylinders, pyramids, cones, and spheres?

Given a surface area, how can we work backwards to find a missing length of a solid.

How do we find volume of prisms, cylinders, pyramids, cones, and spheres?

How are the area formulas of polygons related to the volume formulas of solids?

How can solids be congruent or similar?

How do we find the ratio of areas and the ratio of volumes between similar solids?

Exit Skills

By the end of this unit students will know:

How to identify and use parts of circles.

How to solve problems involving the circumference of a circle.

How to recognize major arcs, minor arcs, semicircles, & central angles and their measures.

How to find arc lengths.

How to recognize and use relationships between arcs & chords.

How to recognize and use relationships between chords and diameters.

How to find measures of inscribed angles.

How to find measures of angles of inscribed polygons.

How to use properties of tangents.

How to solve problems involving circumscribed polygons.

How to find measures of angles formed by lines intersecting on or inside a circle.

How to find measures of angles formed by lines intersecting outside the circle.

How to find measures of segments that intersect in the interior of the circle.

How to find measures of segments that intersect in the exterior of the circle.

How to write equations of circles & graph circles on a coordinate plane.

How to find perimeters and areas of parallelograms.

How to determine whether points on a coordinate plane define a parallelogram.

How to find areas of triangles.

How to find areas of trapezoids and rhombi.

How to find areas of regular polygons.

How to find areas of circles.

How to find areas of composite figures.

How to find areas of composite figures on the coordinate plane.

How to solve problems involving geometric probability.

How to solve problems involving sectors and segments of circles.

How to investigate cross sections of three-dimensional figures.

How to find lateral areas of prisms.

How to find surface area of prisms.

How to find lateral area of cylinders.

How to find surface area of cylinders.

How to find lateral area of regular pyramids.

How to find surface areas of regular pyramids.

How to find lateral areas of cones.

How to find surface area of cones.

How to recognize and define basic properties of spheres.

How to find surface areas of spheres.

How to find volumes of prisms.

How to find volumes of cylinders.

How to find volumes of pyramids.

How to find volumes of cones.

How to find volumes of spheres.

How to solve problems involving volumes of spheres.

How to identify congruent or similar solids.

How to state the properties of similar solids.

How to graph solids in space.

How to use the Distance and Midpoint formulas for points in space.

New Jersey Student Learning Standards (NJSLS)

MA.K-12.1	Make sense of problems and persevere in solving them.
MA.K-12.3	Construct viable arguments and critique the reasoning of others.
MA.K-12.4	Model with mathematics.
MA.K-12.5	Use appropriate tools strategically.
MA.K-12.6	Attend to precision.
MA.G-CO.D.13	Construct an equilateral triangle, a square, and a regular hexagon inscribed in a circle.
MA.G-C.A.1	Prove that all circles are similar.
MA.G-C.A.2	Identify and describe relationships among inscribed angles, radii, and chords.
MA.G-C.A.3	Construct the inscribed and circumscribed circles of a triangle, and prove properties of angles for a quadrilateral inscribed in a circle.
MA.G-C.A.4	Construct a tangent line from a point outside a given circle to the circle.

MA.G-C.B.5	Derive using similarity the fact that the length of the arc intercepted by an angle is proportional to the radius, and define the radian measure of the angle as the constant of proportionality; derive the formula for the area of a sector.
MA.G-GPE.A.1	Derive the equation of a circle of given center and radius using the Pythagorean Theorem; complete the square to find the center and radius of a circle given by an equation.
MA.G-GPE.A.2	Derive the equation of a parabola given a focus and directrix.
MA.G-GPE.B.7	Use coordinates to compute perimeters of polygons and areas of triangles and rectangles, e.g., using the distance formula.
MA.G-GMD.A.1	Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone.
MA.G-GMD.A.2	Give an informal argument using Cavalieri's principle for the formulas for the volume of a sphere and other solid figures.
MA.G-GMD.A.3	Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.
MA.G-GMD.B.4	Identify the shapes of two-dimensional cross-sections of three-dimensional objects, and identify three-dimensional objects generated by rotations of two-dimensional objects.
MA.G-MG.A.1	Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).

Interdisciplinary Connections

9.3.12.FN.1	Utilize mathematical concepts, skills and problem solving to obtain necessary information for decision making in the finance industry.
12.9.3.ST-ET.1	Use STEM concepts and processes to solve problems involving design and/or production.
12.9.3.ST-SM.2	Apply science and mathematics concepts to the development of plans, processes and projects that address real world problems.
LA.9-10.W.9-10.1	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence.
9-12.HS-PS1-4.2	Modeling in 9–12 builds on K–8 and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds.
9-12.HS-PS1-3.3	Planning and Carrying Out Investigations
9-12.HS-PS2-4.5	Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

Learning Objectives

Identify and use parts of circles.

Solve problems involving the circumference of circles.

Recognize major arcs, minor arcs, semicircles, central angles and their measures.

Find arc lengths.

Recognize and use relationships between arcs and chords.

Recognize and use relationships between chords and diameters.

Find measures of inscribed angles.

Find measures of inscribed polygons.

Use properties of tangents.

Solve problems involving circumscribed polygons.

Find measures of angles formed by lines intersecting on or inside a circle..

Find measures of angles formed by lines intersecting outside the circle.

Find measures of segments that intersect in the interior of the circle.

Find measures of segments that intersect in the exterior of the circle.

Write equations of circles and graphing circles on a coordinate plane.

Find perimeters and areas of parallelograms.

Determine whether points on a coordinate plane define a parallelogram.

Find areas of regular polygons.

Find areas of circles.

Find areas of composite figures.

Find areas of composite figures on the coordinate plane.

Solve problems involving geometric probability.

Solve problems involving sectors and segments of circles.

Investigate cross sections of three-dimensional figures.

Find lateral areas of prisms.

Find surface area of prisms.

Find lateral area of cylinders.

Find surface area of cylinders.

Find lateral area of regular pyramids.

Find surface areas of regular pyramids.

Find lateral areas of cones.

Find surface area of cones.

Recognize and define basic properties of spheres.

Find surface areas of spheres.

Find volumes of prisms.

Find volumes of cylinders.

Find volumes of pyramids.

Find volumes of cones.

Find volumes of spheres.

Solve problems involving volumes of spheres.

Identify congruent or similar solids.

State the properties of similar solids.

Graph solids in space.

Use the Distance and Midpoint formulas for points in space.

Action Verbs: Below are examples of action verbs associated with each level of the Revised Bloom's Taxonomy.

Remember	Understand	Apply	Analyze	Evaluate	Create

Alignment to 21st Century Skills & Technology

Develop mathematical thinking using real world problems in the Glencoe Interactive Student Guide Workbook https://catalog.mcgraw-hill.com/repository/private_data/DOC/50001167/94/30.pdf

Mastery and infusion of **21st Century Skills & Technology** and their Alignment to the core content areas is essential to student learning. The core content areas include:

- English Language Arts;
- Mathematics;
- Science and Scientific Inquiry (Next Generation);
- Social Studies and Economics;
- World languages;
- Technology;
- Visual and Performing Arts.

CRP.K-12.CRP2	Apply appropriate academic and technical skills.
CRP.K-12.CRP4	Communicate clearly and effectively and with reason.
CRP.K-12.CRP7	Employ valid and reliable research strategies.
CRP.K-12.CRP8	Utilize critical thinking to make sense of problems and persevere in solving them.
CRP.K-12.CRP11	Use technology to enhance productivity.
TECH.8.1.12.A.3	Collaborate in online courses, learning communities, social networks or virtual worlds to discuss a resolution to a problem or issue.
TECH.8.1.12.F.CS1	Identify and define authentic problems and significant questions for investigation.

21st Century Skills/Interdisciplinary Themes

Glencoe -McGrawHill Resources:

Chapter Projects - Map Your Town, Scientific Method,Function of Lines in Construction, Classifying Triangles, Architecture:Triangular Design, Game Time, Picture This Photography &Tesselations, Graduation Planning, Time or Rebound

- Communication and Collaboration

- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Information Literacy
- Life and Career Skills
- Media Literacy

21st Century Skills

Differentiations:

- Small group instruction
- Small group assignments
- Extra time to complete assignments
- Pairing oral instruction with visuals
- Repeat directions
- Use manipulatives
- Center-based instruction
- Token economy
- Study guides
- Teacher reads assessments allowed
- Scheduled breaks
- Rephrase written directions
- Multisensory approaches
- Additional time
- Preview vocabulary
- Preview content & concepts
- Story guides
- Behavior management plan
- Highlight text
- Student(s) work with assigned partner
- Visual presentation
- Assistive technology
- Auditory presentations
- Large print edition
- Dictation to scribe
- Small group setting

Hi-Prep Differentiations:

- Alternative formative and summative assessments
- Choice boards
- Games and tournaments
- Group investigations
- Guided Reading
- Independent research and projects
- Interest groups
- Learning contracts
- Leveled rubrics
- Literature circles
- Multiple intelligence options
- Multiple texts
- Personal agendas
- Project-based learning
- Problem-based learning
- Stations/centers
- Think-Tac-Toes
- Tiered activities/assignments
- Tiered products

- Varying organizers for instructions

Lo-Prep Differentiations

- Choice of books or activities
- Cubing activities
- Exploration by interest
- Flexible grouping
- Goal setting with students
- Jigsaw
- Mini workshops to re-teach or extend skills
- Open-ended activities
- Think-Pair-Share
- Reading buddies
- Varied journal prompts
- Varied supplemental materials

Interactive Student Notebooks

- printed copy of board work/notes provided
- additional time for skill mastery
- assistive technology
- behavior management plan
- Center-Based Instruction
- check work frequently for understanding
- computer or electronic device utilizes
- extended time on tests/ quizzes
- have student repeat directions to check for understanding
- highlighted text visual presentation
- modified assignment format
- modified test content
- modified test format
- modified test length
- multi-sensory presentation
- multiple test sessions
- preferential seating
- preview of content, concepts, and vocabulary
- Provide modifications as dictated in the student's IEP/504 plan
- reduced/shortened reading assignments
- Reduced/shortened written assignments
- secure attention before giving instruction/directions
- shortened assignments
- student working with an assigned partner
- teacher initiated weekly assignment sheet
- Use open book, study guides, test prototypes

Khan Academy Lessons

SAT/ACT practice problems

- Above grade level placement option for qualified students
- Advanced problem-solving
- Allow students to work at a faster pace
- Cluster grouping
- Complete activities aligned with above grade level text using Benchmark results
- Create a blog or social media page about their unit
- Create a plan to solve an issue presented in the class or in a text
- Debate issues with research to support arguments

- Flexible skill grouping within a class or across grade level for rigor
- Higher order, critical & creative thinking skills, and discovery
- Multi-disciplinary unit and/or project
- Teacher-selected instructional strategies that are focused to provide challenge, engagement, and growth opportunities
- Utilize exploratory connections to higher-grade concepts
- Utilize project-based learning for greater depth of knowledge
