Unit Overview

This unit will present the students with the basic elements and principles of music.

Enduring Understanding

- Music is a non-linguistic communication system
- Music theory systems are dynamic and changing
- Music theory is rooted in Ancient Greek and Roman ideals of beauty
- There are many music theory systems and the theory explored in this course originated in Western Europe
- Combinations and manipulation of musical elements makes a piece of music more or less successful. Knowing theory doesn't guarantee a "good" piece of music.
- Critique is an essential process to music making
- The elements of music contribute to music's aesthetic and expressive nature

- Music is its own language with its own set of structure and syntax

Essential Questions

- What is music?
- How do we use elements of music to communicate?
- Why is there more than one system of music theory?
- What purpose does a system serve?
- What makes a piece of music successful or unsuccessful?
- How does the study of music from different historical periods and cultures enrich my understanding of music today?

Exit Skills

By the end of this unit the students should be able to:

- Decode symbols used in Music
- Use simple music notation

New Jersey Student Learning Standards (NJSLS-S)
