Unit Overview

- Contact among Europeans, Native Americans and Africans, resulted in the Columbian Exchange and significant social, cultural, and political changes on both sides of the Atlantic Ocean.
- Europeans developed a variety of colonization and migration patterns, influenced by different imperial goals, cultures, and the varied North American environments where they settled and they competed with each other and American Indians for resources.
- The British colonies participated in political, social and economic exchanges with Great Britain that encouraged both stronger bonds with Britain and resistance to Britain's control.
- British attempts to assert tighter control over its North American colonies and the colonial resolve to pursue self-government led to a colonial independence movement and the Revolutionary War.
- The American Revolution's democratic and republican ideals inspired new experiments with different forms of government.

- Western expansion led to continued conflict with American Indians and foreign countries.
- Ideas from the Enlightenment and the belief in republican ideas of self-government led to a transformation of political thought in the United States with the ratification of the Constitution.
- Dissatisfaction with the Articles of Confederation led to the writing of the Constitution and the creation of a stronger central government.
- The Constitution was based on the idea of federalism, which divided power between the states and national government.

Essential Questions

1. How did the European powers (Spain, England, France and Netherlands) differed in their colonization as well as economic and imperialistic goals?
2. How did the social and political development of the Spanish, British, French and Dutch colonies affect the Native populations?
3. How did competition over resources between European rivals and American Indians encourage industry and trade which led to conflict in the Americas?
4. How did the the English colonies developed a system of slavery that reflected the specific economic, demographic and geographic characteristics of those colonies?
5. How did the competition among the British, French, and American Indians for economic and political advantage in North

America culminate in the Seven Years' War (the French and Indian War)? (in which Britain defeated France and allied American Indians)

 7. How did the ideals that inspired the revolutionary cause reflected new beliefs about politics, religion, and society that had been developing over the course of the 18th century?
 8. After declaring independence, how did the American political leaders create new constitutions and declarations of rights that articulated the role of the state and federal governments while protecting individual liberties and limiting both centralized power and excessive popular influence?
