Ms. Nicole Shanklin, Director of Elementary Education

Mr. George Droste, Director of Secondary Education

Board Approved: September 23, 2019

## **Unit Overview**

---

In this unit, children will:

- identify air, water, rocks, and soil as natural resources
- use evidence to explain that living things need water, air, and resources from the land
- describe how natural resources work as part of a system in the natural world
- explain ways people use natural resources and the impact they have on the environment
- design and communicate solutions to overcome negative impacts on the environment

## **Enduring Understanding**

---

- Natural resources are anything people can use from nature (air, water, rocks, soil).
- People can do things to harm natural resources.
- People can do things to help save natural resources (reduce, reuse, recycle).
- Reduce means to use less.
- Reuse is to use something again.
- Recycle is to change something to make it into something new.

## **Essential Questions**

---

Lesson 1:

- What are natural resources?

Lesson 2:

- How can we save natural resources?

Unit Project:

- How can you reuse a milk carton?
- What evidence can you collect to show the milk carton has been reused?
- What cause-and-effect relationship will occur when you create a way to reuse the milk carton?

## **Exit Skills**

---

By the end of Grade K Unit 6, the student should be able to:

- tell what a natural resource is
- tell how people use natural resources
- tell how people can help save natural resources

## **New Jersey Student Learning Standards (NJSL-S) & NGSS**

### NextGen Science Standards

K-ESS3-3	Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.
K-ESS3-1	Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live.

## **Interdisciplinary Connections**

---

Do the Math! pp. 249, 268

LA.W.K.2	Use a combination of drawing, dictating, and writing to compose informative/explanatory texts in which they name what they are writing about and supply some information about the topic.
LA.SL.K.5	Add drawings or other visual displays to descriptions as desired to provide additional detail.
MA.K.CC.A.1	Count to 100 by ones and by tens.
MA.K.CC.B.5	Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.

## **Learning Objectives**

---

Lesson 1:

- SWDAT model the relationship between natural resources and how people use them to meet their needs.

Hands-On Activity 1: SWDAT design a model for a way to use a natural resource. Lesson 2:

- SWDAT identify ways people use natural resources.
- SWDAT design and communicate solutions to overcome the negative impact on the environment.

Hands-On Activity 2: SWDAT explore what happens to trash when the choice is made to put it in a landfill. You Solve It:

- SWDAT conclude that people make choices based on many factors, including convenience and environmental impact.
- SWDAT assess the impact of different options at the grocery store.
- SWDAT make choices that will reduce the impact of humans on the environment.

Unit Project:

- SWDAT design ways to reuse a milk carton.
- SWDAT construct an argument using evidence to support a claim.
