Unit Overview

This unit continues to improve students' skills in reading, writing, research, language, and speaking and listening. Students will read and evaluate arguments. Students will also read various essays and texts to better understand the ways writers express ideas. Throughout this unit, students will be engaged in a Writer's Workshop model by focusing on argumentative text. Students will learn the elements of writing arguments. Students will write for a number of reasons, sharing ideas, reflecting on experiences, and gathering evidence. Students will conduct research to clarify and explore ideas. Students will develop an understanding of the proper use of verb tenses. They will then practice demonstrating those verb tenses in their own writing. Students will work together to build on one another's ideas, and communicate with one another. They will also learn to incorporate audio, visuals, and text in presentations.

Enduring Understanding

- In most stories, the plot centers on a conflict or struggle between opposing forces.

- We will learn the importance of empathy and connection with other living things. There is a value of exploration and finding things out for oneself.
- There are two types of conflict. External conflict is a struggle between a character and an outside force, such as another character or nature. Internal conflict is a struggle within a character as he or she wrestles with opposing feelings, beliefs, needs, or desires.
- Argument includes the claim that a writer or speaker presents, as well as supporting reasons and evidence. To evaluate a writer's argument, decide whether the claim is clearly presented and strongly supported by logical reasons and relevant evidence.
- Analyzing one of the author's choices regarding the following: patterns, such as repetition or parallelism, structure, such as cause-and-effect or problem solution, techniques, such as description or dialogue, and ideas, such as the author's main idea or claim.
- There are many different types of evidence students can use to support their argument, including facts, statistics, anecdotes, quotations with authorities, and examples.
- Characteristics that make evidence credible are reliable sources, including government, educational, and professional organizations, degree to which experts have reviewed the evidence for accuracy, and credibility of references and confirmation provided by the source of evidence.

Essential Questions

- Should we make a home in space?
- Do the benefits of exploring Mars outweigh the risks?
- Should space exploration be a priority?
- Should we spend valuable resources on space exploration?
- What are the advantages and dangers of everyone being the same?
- Why is it either good or bad to have memories from the past?

Exit Skills

- This unit continues to improve students' skills in reading, writing, research, language, and speaking and listening.
- Students will read and evaluate arguments.
- Students will also read nonfiction narratives and explanatory essays to better understand the ways writers express ideas.
- Students will learn the elements of writing arguments. Students will write for a number of reasons, sharing ideas, reflecting on experiences, and gathering evidence.
- Students will conduct research to clarify and explore ideas. Students will develop an understanding of the proper use of verb tenses.
- They will then practice demonstrating those verb tenses in their own writing.
- Students will collaborate to build on one another's ideas, and communicate with one another. They will also learn to incorporate audio, visuals, and text in presentations.
