

Unit 1 Linear Equations

Content Area: **Math**
Course(s): **Algebra 1H**
Time Period:
Length: **30 days**
Status: **Published**

Algebra 1 Honors

Department of Curriculum and Instruction

Belleville Public Schools

Curriculum Guide

Algebra 1 H, Grade 8

UNIT 1 : Linear Equations

Belleville Board of Education

102 Passaic Avenue

Belleville, NJ 07109

Prepared by: **Instructional Coach, Lori Whittom**

Dr. Richard Tomko, Ph.D., M.J., Superintendent of Schools

Ms. LucyAnn Demikoff, Director of Curriculum and Instruction K-12

Ms. Nicole Shanklin, Director of Elementary Education

Mr. George Droste, Director of Secondary Education

Board Approved: September 23, 2019

Unit Overview

Unit1 : Solving linear equations, equations involving absolute value and problems involving percent.

- From this unit students should expect to learn how to solve one and multi-step equations
- write mathematical sentences into equations and vice versa
- solve absolute value equations
- compare ratios
- solve proportions
- find percent of change and solve problems involving percent.

Enduring Understanding

Students will be able to use their learning to:

- Interpret and represent expressions and equations to model real-world situation.
- Use the structure of an expression to help simplify and regroup terms to find solutions to problems. This will help to interpret more complex expressions, as well as equations and inequalities.
- Communicate about ideas in Algebra in a standard and understandable manner.
- Relate the topics learned in Algebra to things that they do in their everyday lives.
- Become proficient in daily skills involving mathematics.
- Make sense of problems and persevere in solving them
- Construct viable arguments and critique the reasoning of others
- Attend to precision

- Look for and express regularity in repeated reasoning
- Use appropriate tools strategically
- Reason abstractly and quantitatively
- Model with mathematics
- Look for and make use of structure

Essential Questions

- How do you interpret and evaluate algebraic expressions that model real-world situation?
- What kinds of relationships can proportions represent?
- Can equations that appear to be different be equivalent?
- How can you rewrite algebraic expressions?
- How can you solve equations?
- How do you write algebraic expression to model quantities?
- How do you represent relationship algebraically?

Exit Skills

By the end of Unit 1 Students Should be able to:

- Translate sentences into equations and equations into sentences
- Solve equations involving more than one operation
- Solve equations involving consecutive integers
- Solve equations with the variable on each side
- Solve equations involving grouping symbols
- Justify each step in solving equations using properties
- Evaluate absolute value expressions
- Solve absolute value equations
- Analyze and explain the process of solving an equation and justify the process used in solving a system of equations.
- Develop fluency in writing, interpreting, and translating among various forms of linear equations and use them to solve problems.
- Master the solution of linear equations and apply related solution techniques.
- Compare ratios
- Solve proportions
- Solve problems involving percent
- Find percent of change

- Use formulas to solve real-world problems

New Jersey Student Learning Standards (NJSL)

MA.N-Q.A.1	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.
MA.K-12.1	Make sense of problems and persevere in solving them.
MA.K-12.2	Reason abstractly and quantitatively.
MA.K-12.3	Construct viable arguments and critique the reasoning of others.
MA.K-12.4	Model with mathematics.
MA.K-12.5	Use appropriate tools strategically.
MA.K-12.6	Attend to precision.
MA.K-12.8	Look for and express regularity in repeated reasoning.
MA.A-CED.A.1	Create equations and inequalities in one variable and use them to solve problems.
MA.A-CED.A.4	Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations.
MA.A-REI.A.1	Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.
MA.A-REI.B.3	Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.

Interdisciplinary Connections

Economics, Business, Financing, Geometry, Literacy and Science

LA.SL.8.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LA.SL.8.1.B	Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.
LA.SL.8.1.C	Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.
LA.SL.8.1.D	Acknowledge new information expressed by others, and, when warranted, qualify or

justify their own views in light of the evidence presented.

Learning Objectives

Students will be able to:

- Represent relationships algebraically and evaluate them using properties .
- Interpret and evaluate real-word expressions bu introducing a variable.
- Solve one-step equations in one variable using different operations.
- Solve multi-step equations and justify each step using properties.
- Solve equations with the variables on both sides using like terms and the distributive property.
- Identify equations that are identities or have no solution.
- Rewrite and use literal equations and formulas by solving them for the specific variable.
- Convert units and rates into different ones and understand the difference between them.
- Apply proportions to solve the real-world situations by applying the cross product method .
- To solve percent problems and find percent change by using proportions and equations.
- Model real-world situations using expressions and equations.
- Investigate and extend classroom activities into self research and long term projects.

Alignment to 21st Century Skills & Technology

- English Language Arts;
- Science and Scientific Inquiry (Next Generation);
- Social Studies
- Economics
- Technology

CRP.K-12.CRP2	Apply appropriate academic and technical skills.
CRP.K-12.CRP4	Communicate clearly and effectively and with reason.
CRP.K-12.CRP7	Employ valid and reliable research strategies.
CRP.K-12.CRP8	Utilize critical thinking to make sense of problems and persevere in solving them.
CRP.K-12.CRP11	Use technology to enhance productivity.
CAEP.9.2.8.B.2	Develop a Personalized Student Learning Plan with the assistance of an adult mentor that includes information about career areas of interest, goals and an educational plan.
CAEP.9.2.8.B.3	Evaluate communication, collaboration, and leadership skills that can be developed through school, home, work, and extracurricular activities for use in a career.
TECH.8.1.12.A.3	Collaborate in online courses, learning communities, social networks or virtual worlds to discuss a resolution to a problem or issue.
TECH.8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
TECH.8.2.12.D.CS2	Use and maintain technological products and systems.

21st Century Skills/Interdisciplinary Themes

- Communication and Collaboration
- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Information Literacy
- Life and Career Skills

21st Century Skills

- Civic Literacy
- Environmental Literacy
- Financial, Economic, Business and Entrepreneurial Literacy
- Health Literacy

Differentiation

- Use of algebra tiles to model solving equations(Mcgraw Hill Algebra 1 textbook page 81)
- Use of Algebra tiles to model multi-step equations(Mcgraw Hill Algebra 1 textbook page 90)

- Small group instruction
- Small group assignments
- Extra time to complete assignments
- Pairing oral instruction with visuals
- Repeat directions
- Use manipulatives
- Center-based instruction
- Study guides
- Rephrase written directions
- Additional time
- Preview vocabulary
- Preview content & concepts
- Student(s) work with assigned partner
- Visual presentation
- Assistive technology
- Large print edition
- Alternative formative and summative assessments
- Choice boards
- Group investigations
- Leveled rubrics
- Project-based learning
- Problem-based learning
- Stations/centers
- Think-Tac-Toes
- Tiered activities/assignments

Special Education Learning (IEP's & 504's)

Use of an equation mat and two color counters to model equations and demonstrate inverse operations

- printed copy of board work/notes provided
- additional time for skill mastery
- assistive technology
- check work frequently for understanding
- computer or electronic device utilizes
- extended time on tests/ quizzes
- have student repeat directions to check for understanding
- highlighted text visual presentation
- modified assignment format

- modified test content
- modified test format
- modified test length
- preferential seating
- preview of content, concepts, and vocabulary
- Provide modifications as dictated in the student's IEP/504 plan
- secure attention before giving instruction/directions
- shortened assignments
- student working with an assigned partner
- Use open book, study guides, test prototypes

English Language Learning (ELL)

The Glencoe Personal Tutor(Spanish):

Solve a consecutive integer tutorial

Write and solve a multistep equation tutorial

- teaching key aspects of a topic. Eliminate nonessential information
- using videos, illustrations, pictures, and drawings to explain or clarify
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning;
- allowing students to correct errors (looking for understanding)
- allowing the use of note cards or open-book during testing
- decreasing the amount of work presented or required
- having peers take notes or providing a copy of the teacher's notes
- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers

At Risk

Graphing calculator(TI-84) introduction

The Glencoe Personal Tutor

Glencoe -McGrawHill Resources

Teaching Algebra with Manipulatives: Algebra Tiles (pgs.81, 90)

Math Triumphs

Algebra 1 Study Notebook

- allowing students to correct errors (looking for understanding)
- teaching key aspects of a topic. Eliminate nonessential information
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning
- allowing students to select from given choices
- allowing the use of note cards or open-book during testing
- collaborating (general education teacher and specialist) to modify vocabulary, omit or modify items to reflect objectives for the student, eliminate sections of the test, and determine how the grade will be determined prior to giving the test.
- decreasing the amount of work presented or required
- having peers take notes or providing a copy of the teacher's notes
- marking students' correct and acceptable work, not the mistakes
- modifying tests to reflect selected objectives
- providing study guides
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using authentic assessments with real-life problem-solving
- using videos, illustrations, pictures, and drawings to explain or clarify

Talented and Gifted Learning (T&G)

- Figure This! Bet I can Guess your Color Magic: writing expressions and equations <https://figurethis.nctm.org/challenges/c60/challenge.htm>

- Advanced problem-solving
- Allow students to work at a faster pace
- Complete activities aligned with above grade level text using Benchmark results
- Create a blog or social media page about their unit

- Flexible skill grouping within a class or across grade level for rigor
- Higher order, critical & creative thinking skills, and discovery
- Multi-disciplinary unit and/or project
- Teacher-selected instructional strategies that are focused to provide challenge, engagement, and growth opportunities
- Utilize exploratory connections to higher-grade concepts
- Utilize project-based learning for greater depth of knowledge

Sample Lesson

Unit Name: Linear Equations

NJSLS:

A.REI.1 Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.

A.REI.3 Solve linear equations in one variable, including equations with coefficients represented by letters.

Differentiation/Modifications: Cooperative groups, Study Guide, Teacher's notes, Calculator.

Interdisciplinary Connection: Number Theory, Writing, Financing.

Statement of Objective: After reviewing the Do now and HW students will analyze and translate real-word examples into mathematical equations and solve them by combining like terms and using the distributive property.

Anticipatory Set/Do Now: Do now: Simplify 3 examples using like terms and the distributive property.

Learning Activity: The students will work in small groups analyzing the given assignment to create equations, solve them and discuss the answer and solutions with other groups.

Student Assessment/CFU's: Questions and Answers, Oral Response, Board work ,Observation, Self-Assessment

Materials: Notebook, Textbook, Study Guide, Teacher's worksheet.

21st Century Themes and Skills: Global Awareness,Financial,Economic,Business and Entrepreneurial Literacy.

Integration of Technology: Smart TV, Calculator
