## **Unit Overview**

---

### Unit 3 – Acrylic Painting

1. Allow students to discover the diversity in and connections among forms of artistic expression throughout history and from around the globe.
2. Allow students to learn about how people have responded to and communicated their experiences through art making by exploring art in its historic and cultural contexts.
3. Welcome students into the global art world as active participants, engaging with its forms and content as they research, discuss, read, and write about art, artists, art making, and responses to and interpretations of art.
4. Explore global art with the development of deep conceptual understandings and art historical skills.

## **Enduring Understanding**

---

1. Recognize that Acrylic paint may be thinned with water and used as washes in the manner of watercolor paints, but the washes are not re-hydratable once dry.
2. Recognize only an artist-grade acrylic gesso should be used to prime canvas in preparation for painting with acrylic.
3. Recognize that sgraffito is particularly useful for drawing into acrylic paint to suggest shape and form using a palette knife or any pointed object to create interesting textures and outlines.
4. Recognize the technique of scraping back and removing large sections of paint, leaving a textured finish below.
5. Recognize a common technique employed to strengthen form is to use the end of the brush to score into impasto paint. Combs, forks, or any rigid instrument can be used to scratch into the paint to create texture. It is, however, best to AVOID scratching into dry paint, for this may damage the canvas.
6. Recognize that tonking is the technique that can be very useful for acrylic painters. When an area becomes overloaded with paint, this is the best way of reducing the amount of paint without disturbing the underlying structure of what has been laid down.
7. Glazing is a method of laying one thin wash of color over another so that each layer modifies the one below. Glazes are very thin, so that light can travel through and be reflected back. This gives them their luminous quality.
8. Recognize glazing is a method of laying one thin wash of color over another so that each layer modifies the one below. Glazes are very thin, so that light can travel through and be reflected back. This gives them their luminous quality
9. Recognize when dry, acrylic paint is generally non-removable from a solid surface. Water or mild solvents do not re-solubilize it.
10. Careers in art, commercial illustration and design.

## **Essential Questions**

---
