Unit Overview

Unit 2 – Oil Painting

1. Allow students to discover the diversity in and connections among forms of artistic expression throughout history and from around the globe.
2. Allow students to learn about how people have responded to and communicated their experiences through

art making by exploring art in its historic and cultural contexts.

3. Welcome students into the global art world as active participants, engaging with its forms and content as they research, discuss, read, write, and create art, and interpretations of art.

4. Explore oil painting with the development of deep conceptual understandings and skills.

Enduring Understanding

1. Recognize that oil paint may be thinned with linseed oil.
2. Recognize only an artist-grade acrylic gesso should be used to prime canvas in preparation for painting with oil.
3. Recognize that sgraffito is particularly useful for drawing into oil paint to suggest shape and form using a palette knife or any pointed object to create interesting textures and outlines.
4. Recognize the technique of scraping back and removing large sections of paint, leaving a textured finish below.
5. Recognize a common technique employed to strengthen form is to use the end of the brush to score into impasto paint. Combs, forks, or any rigid instrument can be used to scratch into the paint to create texture. It is, however, best to avoid scratching into dry paint, for this may damage the canvas.
6. Recognize that tonking is the technique that can be very useful for oil painters. When an area becomes overloaded with paint, this is the best way of reducing the amount of paint without disturbing the underlying structure of what has been laid down.

7. Glazing is a method of laying one thin wash of color over another so that each layer modifies the one below. Glazes are very thin, so that light can travel through and be reflected back. This gives them their luminous quality.
8. Recognize glazing is a method of laying one thin wash of color over another so that each layer modifies the one below. Glazes are very thin, so that light can travel through and be reflected back and achieve a luminous quality.
9. Recognize the discovery of oil suspended pigments during the Renaissance.

Essential Questions

1. Why do we study painting, specifically painting with oil paint?
2. What are characteristics and techniques specific to oil painting?
3. How does an artist determine whether oil paint is the correct medium for the desired effect?
4. How is oil paint unique?
5. How does one develop one's aesthetic?
6. What is art and how is it made?
7. Why and how does art change?
8. How do we describe our thinking of art?
