## **Unit Overview**

---

This unit will focus on the socially, artistically, and musically significant historic events of the Baroque period in human history. The students will discuss the impact that these events had on the creation process and how society is reflected in music.

## **Enduring Understanding**

---

- Music is a non-linguistic communication system
- Music theory systems are dynamic and changing
- Music theory is rooted in Ancient Greek and Roman ideals of beauty
- There are many music theory systems and the theory explored in this course originated in Western Europe
- Combinations and manipulation of musical elements makes a piece of music more or less successful. Knowing theory doesn't guarantee a "good" piece of music.

- Critique is an essential process to music making
- The elements of music contribute to music's aesthetic and expressive nature
- Music is its own language with its own set of structure and syntax

## Essential Questions

---

- What is music?
- How do we use elements of music to communicate?
- Why is there more than one system of music theory?
- What purpose does a system serve?
- What makes a piece of music successful or unsuccessful?
- How does the study of music from different historical periods and cultures enrich my understanding of music today?

## Exit Skills

---

By the end of this unit the students should be able to:

- Identify changes in world culture
- Describe differences and similarities in the cultures of modern day and the baroque period
- Use critical thinking skills attained in other subjects and areas.
