Constructing with a sewing machine (serger or embroidery machine) starts with familiarity of its parts and understanding how they work. Sewing tools and equipment aid in garment/project preparation. A sewing machine consists of many functional parts. Each doing a specific job. Threading the machine must be done exactly in order for the machine to run correctly. Stitching accurately and safely involves operating the machine at a controlled rate of speed. Utilizing the machine effectively requires understanding and the proper machine settings. These new experiences and abilities must be developed and practiced to become proficient construction techniques. In addition to building new sewing machine skills, proper care and maintenance of the machine are essential.
