## **Unit Overview**

---

Patterns can be found in specialty sewing and fabric stores, craft and quilt stores, and sewing machine dealerships. Pattern catalogs are divided into projects by categories, and arranged by degree of sewing difficulty. Garment patterns are sized by personal body measurements. Reading the pattern envelop is essential. The front of the pattern envelop contains optional style variations of the same project. The back lists information about project details, fabric types, yardage amounts, and sewing notions. Inside are the pattern pieces, key and glossary information, pattern layout and instruction sheets. Sewing knowledge is needed to decode pattern pieces and read pattern symbols, to select and purchase fabric, to layout and cut out pattern pieces, and mark construction points. Working with patterns are fundamental construction skills that must be developed. They are the foundations of sewing success.

- Sewing knowledge and skills are needed to construct a project utilizing commercial pattern.
- Patterns envelopes contain information required to construct the project.
- Reading pattern symbols is essential in laying out the pattern correctly before cuttingting the right fabric, the correct amount and preparing it for the project is crucial before laying out the pattern pieces.
- The pattern size must be customized based on individual body measurements. This must be done during the laying out process utilizing pattern symbols.
- Sewing notions are needed to complete sewing projects.
