This unit will involve students focusing on the advanced concepts of rhythm while exploring facets of improvisation in music as well as compositional techniques. Students will utilize various instruments and vocal styles to improvise various songs. They will then be able to create their own personal music creations using compositional techniques, handwritten and in notational software.

## **Enduring Understanding**

---

**Definition:** *Enduring Understandings*

Enduring understandings are statements summarizing important ideas and core processes that are central to a discipline and have lasting value beyond the classroom. They synthesize what students should understand—not just know or do—as a result of studying a particular content area. Moreover, they articulate what students should “revisit” over the course of their lifetimes in relationship to the content area.

- Rhythm is one the core elements of music
- Improvisation is a technique used to create music in the moment given a particular structure

- Music composers use various techniques to create simple and complex musical works

## Essential Questions

---

**Essential Question:** A question that lies at the heart of a subject or a curriculum and one that promotes inquiry and the discovery of a subject.

- How can I compose my own music?
- How can I learn to improvise music?
- How can music notation software assist in composing music?
- What do I need to listen for in order to improvise?
- What areas of music need to be considered to achieve musical literacy?

## Exit Skills

---

By the end of this unit, General Music students should be able to:

- Define improvisation
- Expand and apply knowledge of rhythmic capabilities
- Recognize, explain, and perform basic symbols and markings in concert music
- Perform rhythms while keeping steady time and change based upon suggestions
- Compose a short song via handwritten techniques and notational software
- Analyze performances listening critically for correct stylizations
- Demonstrate proficiency in basic musical symbols and their execution
