Unit Overview

Music Theory contains the process of reading and writing music which are essential to music performance. Basic theory terms such as scales and scale construction will be examined, as well as dynamics and a brief review of rhythm, which are the essential building blocks for any musical composition. Students will use concert music to recognize their importance in musical compositions. Students will be able to successfully perform a Bb major scale, and simple melodies using notes from the scale.

Enduring Understanding

Definition: *Enduring Understandings*

Enduring understandings are statements summarizing important ideas and core processes that are central to a discipline and have lasting value beyond the classroom. They synthesize what students should understand—not just know or do—as a result of studying a particular content area. Moreover, they articulate what students should “revisit” over the course of their lifetimes in relationship to the content area.

- Music theory is the backbone of all types of music
- Scales are the building blocks for all written and composed music
- Dynamics made music interesting
- Understanding how music is written will help to better perform music for a lifetime

Essential Questions

Essential Question: A question that lies at the heart of a subject or a curriculum and one that promotes inquiry and the discovery of a subject.

- How can I compose and perform a scale?
- How can I learn to read and decode music and music symbols?
- Why are all of the markings written in Italian?
- Why is sight-reading so important to being a well-rounded musician?
- Why can't I play loudly all of the time?
- What is the role of music in today's society?
- What areas of music need to be considered to achieve musical literacy?

Learning Objectives

Tips on Writing Good Learning Objectives

Bloom's Taxonomy

Applying Bloom's Taxonomy to Learning Objectives

Effective learning objectives need to be observable and/or measureable, and using action verbs is a way to achieve this. Verbs such as “identify”, “argue,” or “construct” are more measureable than vague or passive verbs such as “understand” or “be aware of”. As you develop your syllabus focus on articulating clear learning objectives and then use these objectives to guide class assignments, exams and overall course assessment questions.

Sample Learning Objectives for a Lower Division Course

After completing *Nutrition 101 Humans and Food*, students will be able to:

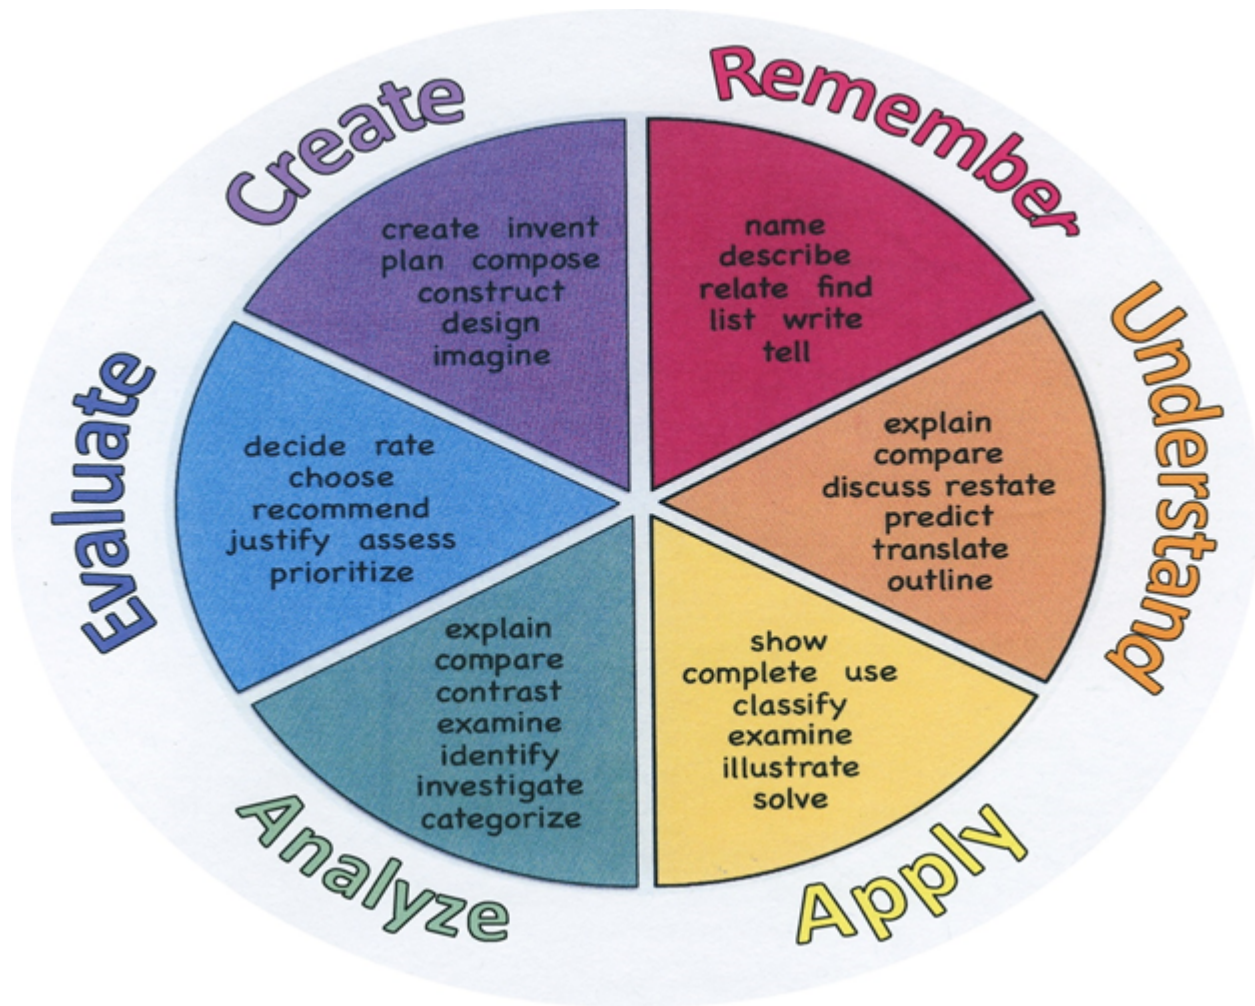

- **Identify** nutrients found in common food sources via the product's nutrition label
- Use computer dietary analysis to assess a 2-day dietary intake and **summarize** results
- **Locate** nutrition-related information on the Internet and use **evaluative** criteria to **identify** reliability of the information

Action Verbs

Below are examples of action verbs associated with each level of the Revised Bloom's Taxonomy. These are useful in writing learning objectives, assignment objectives and exam questions.
