## Mathematics: Grade 1

### Unit 6: Shapes and Their Attributes and Equal Shares

**Belleville Board of Education** 

**102** Passaic Avenue

Belleville, NJ 07109

Prepared by: Jaclyn Corino, Morgan Chapman, Jenny Reis

- Dr. Richard Tomko, Ph.D., M.J., Superintendent of Schools
- Dr. Giovanni Cusmano, Director of Elementary Education K -8
- Mr. George Droste, Director of Secondary Education

Board Approved: August 30, 2017

#### **Unit Overview**

Unit 6 introduces students to shapes and their attributes. In this unit, students will also be dividing circles and rectangles into equal shares.

- Builds on understanding of defining and non-defining attributes of two-dimensional and three-dimensional shapes
- Put togehter various shapes to create composite shapes and use the composite shapes to create new shapes
- Builds a foundation for fractions
- Focuses on partitioning circles and rectangles into 2 or 4 equal shares.

(Reference topics 14 and 15 in the teacher's edition)

#### NJSLS

Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to

MA.1.G.A.2

possess defining attributes.

Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.

#### **Exit Skills**

By the end of Grade 1 Mathematics, students in the Belleville Public Schools will be able to:

# • Develop an understanding of addition, subtraction, and strategies for addition and subtraction within 20:

Students develop strategies for adding and subtracting whole numbers. They use a variety of methods, including discrete objects, to model add-on, take from, put-together, take-apart, and compare situations to develop meaning for the operations of addition and subtraction, and to develop strategies to solve arithmetic problems with these operations. Students understand connections between counting and addition and subtraction (e.g., adding two is the same as counting on two). They use properties of addition to add whole numbers and to create and use increasingly sophisticated strategies based on these properties (e.g., ?making tens?) to solve addition and subtraction problems within 20. By comparing a variety of solution strategies, children build their understanding of the relationship between addition and subtraction.

# • Develop an understanding of whole number relationships and place value, including grouping in tens and ones:

Students develop, discuss, and use efficient, accurate, and generalizable methods to add within 100 and subtract multiples of 10. They compare whole numbers (at least to 100) to develop understanding of and solve problems involving their relative sizes. They think of whole numbers between 10 and 100 in terms of tens and ones (especially recognizing the numbers 11 to 19 as composed of a ten and some ones). Through activities that build number sense, they understand the order of the counting numbers and their relative magnitudes.

# • Develop an understanding of linear measurement and measuring lengths as iterating length units:

Students develop an understanding of the meaning and processes of measurement, including underlying concepts such as iterating (building up the length of an object with equal-sized units) and the transitivity principle for indirect measurement.

#### • Reason about attributes of, and composing and decomposing geometric shapes:

Students compose and decompose plane or solid figures to build understanding of part-whole relationships as well as the properties of the original and composite shapes. As they combine shapes, they recognize them from different perspectives and orientations, describe their geometric attributes, and determine how they are alike and different, to develop the background for measurement and for initial understandings of properties such as congruence and symmetry.

- Two-dimensional shapes have attributes that define them and make them different from one another.
- Plane shapes have many properties that amke them different from one another. These properties can eb used to create shapes.

#### Topic 15:

- A region can be divided into equal-sized shares in different ways. Equal-sized shares of a region have the same area buy not necessarily the same shape.
- Shapes can be divided into equal parts called halves and quarters, or fourths.
- When dividing a whole into fractions, the smaller the fractional piece, the greater the number of pieces; the larger the piece, the fewer the number of pieces.
- Good math thinkers use math they know to show and solve problems.

#### **Essential Questions**

- How can you define shapes and compose new shapes?
- What are some different names for equal shares?

#### **Learning Objectives**

#### After completing Unit 6, students will be able to:

#### Topic 14

- Use attributes to match shapes.
- **Define** 2-D shapes by their attributes.
- Use materials to build and draw 2-D shapes.

#### Topic 15

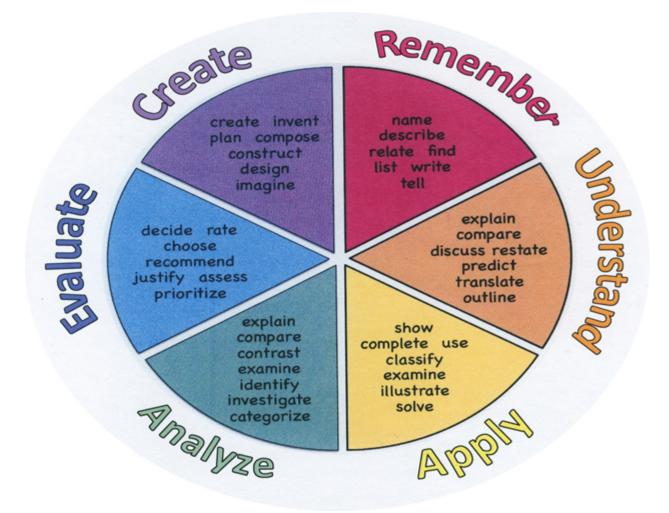

- **Determine** whether shapes are divided into equal shares.
- **Divide** shapes into 2 and 4 equal shares and use words to describe those shares.
- Understand that more equal shares of the same whole creates smaller shares.
- Understand how to make a drawing to show a problem about equal shares.

#### **Action Verbs**

Below are examples of action verbs associated with each level of the Revised Bloom's Taxonomy. These are useful in writing learning objectives, assignment objectives and exam questions.

	Remember	Understand	Apply	Analyze	Evaluate	Create
--	----------	------------	-------	---------	----------	--------

Choose	Classify	Choose	Categorize	Appraise	Combine
Describe	Defend	Dramatize	Classify	Judge	Compose
Define	Demonstrate	Explain	Compare	Criticize	Construct

	Extrapolate	Subtract			
	Generalize				
	Predict				

#### **Interdisciplinary Connections**

Each topic has an interactive story and a STEM component.

Reference the "Topic Opener" pages in teacher's edition for STEM projects for topics 14 (pg. 741) and 15 (pg 813).

LA.K-12.NJSLSA.R	Reading
LA.K-12.NJSLSA.W	Writing
SCI.K-2-ETS1	Engineering Design
TECH.8.1.2	Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

#### Alignment to 21st Century Skills & Technology

#### **Key SUBJECTS AND 21st CENTURY THEMES**

Mastery of key subjects and 21st century themes is essential for all students in the 21st century.

Key subjects include:

- English, reading or language arts
- World languages
- Arts
- Mathematics
- Economics
- Science
- Geography
- History
- Government and Civics

#### 21st Century/Interdisciplinary Themes

- Civic Literacy
- Environmental Literacy
- Financial, Economic, Business and Entrepreneurial Literacy
- Global Awareness
- Health Literacy

#### **21st Century Skills**

- Communication and Collaboration
- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Information Literacy
- Life and Career Skills
- Media Literacy

#### **Technology Infusion**

EnVision 2.0 Digital Resources, SMART Board

#### Differentiation

As a Reminder:

The basis of good differentiation in a lesson lies in differentiating by content, process, and/or product.

Resources:

- NJDOE: Instructional Supports and Scaffolds for Success in Implementing the Common Core State Standards http://www.state.nj.us/education/modelcurriculum/success/math/k2/
- enVision math 2.0 Technology Center,
- On-Level and Advanced Activity Centers
- Math Diagnosis and Intervention System 2.0 (accessed through PearsonRealize.com)
- Monitor progress, reteach as needed, and extend student thinking.
- Assess to identify students needs and then provide appropriate support.
- As needed, provide more instruction that is on level or below grade level for the students who are struggling.
- Use vocabulary cards, vocabulary activities, vocabulary review, and vocabulary glossary.
- Utilize Quick Check found in order to determine differentiation of instruction.
- Assess and differentiate page will prescribe the differentiated instruction activity.

#### **Special Education**

- printed copy of board work/notes provided
- additional time for skill mastery
- assistive technology
- behavior management plan
- Center-Based Instruction
- check work frequently for understanding
- computer or electronic device utilizes
- extended time on tests/ quizzes
- have student repeat directions to check for understanding
- highlighted text visual presentation
- modified assignment format
- modified test content
- modified test format
- modified test length
- multiple test sessions
- multi-sensory presentation
- preferential seating
- preview of content, concepts, and vocabulary

- reduced/shortened reading assignments
- Reduced/shortened written assignments
- secure attention before giving instruction/directions
- shortened assignments
- student working with an assigned partner
- · teacher initiated weekly assignment sheet
- Use open book, study guides, test prototypes

#### ELL

- teaching key aspects of a topic. Eliminate nonessential information
- using videos, illustrations, pictures, and drawings to explain or clarif
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning;
- allowing students to correct errors (looking for understanding)
- allowing the use of note cards or open-book during testing
- decreasing the amount of workpresented or required
- having peers take notes or providing a copy of the teacher's notes
- · modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using computer word processing spell check and grammar check features
- using true/false, matching, or fill in the blank tests in lieu of essay tests

#### **Intervention Strategies**

- allowing students to correct errors (looking for understanding)
- teaching key aspects of a topic. Eliminate nonessential information
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning
- allowing students to select from given choices
- allowing the use of note cards or open-book during testing
- collaborating (general education teacher and specialist) to modify vocabulary, omit or modify items to reflect objectives for the student, eliminate sections of the test, and determine how the grade will be determined prior to giving the test.
- decreasing the amount of workpresented or required
- having peers take notes or providing a copy of the teacher's notes
- marking students' correct and acceptable work, not the mistakes

- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using authentic assessments with real-life problem-solving
- using true/false, matching, or fill in the blank tests in lieu of essay tests
- using videos, illustrations, pictures, and drawings to explain or clarify

#### **Evidence of Student Learning-CFU's**

Please list ways educators may effectively check for understanding in this secion.

- Admit Tickets
- Anticipation Guide
- Common benchmarks
- Compare & Contrast
- Create a Multimedia Poster
- Define
- Describe
- Evaluate
- Evaluation rubrics
- Exit Tickets
- Explaining
- Fist- to-Five or Thumb-Ometer
- Illustration
- Journals
- KWL Chart
- Newspaper Headline
- Outline
- Question Stems
- Quickwrite
- Quizzes
- Red Light, Green Light
- Self- assessments
- Socratic Seminar
- Study Guide
- Teacher Observation Checklist
- Think, Pair, Share
- Think, Write, Pair, Share

- Top 10 List
- Unit tests
