## **Unit Overview**

---

During Unit 3, students will explore different themes and scenarios that will guide them in formulating their own thoughtful responses to this unit's big idea: "What have you learned about the world that surprises you?" Students will discuss facts with each other about a place in the natural world that surprised them. Each week students will produce a project related to the Essential Question. They will then develop one of these projects more fully for the Unit Research Project. Through their research, students will focus their attention on comparing information across sources and recalling, paraphrasing, and presenting information they have found. As students read and reread each week for close reading of text, they take notes, cite text evidence to support their ideas and opinions, and write short analytical responses. After reading, students build writing fluency, analyze model responses, craft longer responses incorporating text evidence, and focus on writing traits.

## **Enduring Understandings**

---

Students will understand that...

- gravity is a force that pulls objects down.
- we can see things during the day because the Sun lights the sky.
- during nighttime, it is dark outside. The Sun does not light the sky then. During the nighttime, people can sometimes see the Moon. Moonlight is the light we see from the Moon at night.
- people can help out their community when they focus on the problem and the neighbors' idea for a solution.
- weather affects the different kinds of clothing we wear in different kinds of weather.
- different kinds of weather allows us to go outside, and other types of weather causes us to stay indoors.
- making music, writing, drawing, and painting are some ways to express yourself.

## **Essential Questions**

---

- How do the earth's forces affect us?
- What can we see in the sky?
- How can people help out their community?

- How does weather affect us?
- How do you express yourself?
- What have you learned about the world that surprises you?
