Unit Overview

Within Unit Four, students will explore how making informed decisions will help them to live healthier lives, how their skills and talents can help others, how animals and people have adapted to their environment, and how people who are courageous inspire others to do the same. Students will practice asking and answering questions to work on metacognition during the reading process, as well as explore point of view. Each week students will produce a project related to the Essential Question. They will then develop one of these projects more fully for the Unit Research Project. Through their research, students will focus their attention on comparing information across sources and recalling, paraphrasing, and presenting information they have found. As students read and reread each week for close reading of text, they take notes, cite text evidence to support their ideas and opinions, and write short analytical responses. After reading, students build writing fluency, analyze model responses, craft longer responses incorporating text evidence, and focus on writing traits.

Enduring Understandings

Students will understand that...

- we make decisions every day and smart choices help us to live healthy lives.
- we use our talents to help others and our special talents and skills help to make us feel good.
- animals have adaptations to help them survive within their environments.
- people have wanted to fly for hundreds of years and smart thinking by inventors has helped to solve the problem by inventing helicopters, planes, and hot air balloons.
- people who are courageous inspire us and make us want to then inspire others.

Essential Questions

- What are different ways to meet challenges?
- What choices are good for us?

- How can you use what you know to help others?
- How do animals adapt to challenges within their habitat?
- How are people able to fly?
- How can others inspire us?

Exit Skills

By the end of Unit 4: Meet the Challenge, students should be able to...

- engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 3 topics and texts*, building on others' ideas and expressing their own clearly.
- create real-life connections between words and their use (e.g., describe people who are *friendly* or *helpful*).

Differentiation

- **Content:** Content will be differentiated through use of multilevel readers for Basic Skills students, Special Education students, Talented and Gifted students, as well as ELL students. The readers are all focused upon the same content, however the lexiles differ depending upon the abilities of the student.
- **Process:** The process will be differentiated through supplying three tiers of questioning for basic, intermediate, and advanced learners. Additionally, students will be supplied with sentence stems and differentiated student workbooks to foster student success of the established goals.
- **Product:** The product will be differentiated because student work will be based upon their reading levels and lexiles. Students will be given choice for projects that appeal to their various learning styles to promote confidence and success amongst the students.
- During **Readers Workshop**, teachers will incorporate differentiation through guided reading, the use of leveled readers and strategy groups. Students also have the choice of selecting their own books to read independently. This can be a controlled choice of books so that they are reading on their independent reading level.
- Through **Writers Workshop**, teachers will conference with students in order to individualize instruction. This can be done through one-on-one conferencing or with small conference groups. During this time, students can choose their own writing topic within the unit's genre.
