## **Unit Overview**

---

Within Unit Three, students will explore why individual qualities are important. This unit will focus on a variety of genres that will help students dissect the big idea. It will also focus on animals and their unique qualities, special character traits that lead to greatness, the unique qualities of Earth and the surrounding systems, the special features that make nature unique, and finally, the importance of specific events within history. Additionally, the unit will be focusing on such strategies as visualizing and summarizing, as well as the skills of problem and solution, cause and effect, main idea and supporting details, and sequencing.

## **Enduring Understandings**

---

Students will understand that...

- individual qualities are important because it's these special qualities that make each person unique and different. Individual qualities help to make our world an interesting place, rather than having everything being the same without variation.
- all animals have different qualities that make them unique. The animals use these different qualities as ways to protect themselves, communicate, and survive in their environment.
- some people in our world possess qualities that make them brave and stand up for things that they believe in. These individuals can inspire groups of people to change their way of thinking through the actions in which they model.
- scientists and astronomers use special instruments to study Earth and the universe. They make new discoveries everyday about Earth and the universe.
- scientists study nature every day and use it to create new ideas. These new ideas are then used to help people in many ways.
- history is made up of many unique events. We use these events to learn from the past, and help guide future decisions.

## **Essential Questions**

---

- Why are individual qualities important?
- What makes different animals unique?

- How can one person change the way you think?
- What do we know about Earth and its neighbors?
- What ideas can we get from nature?
- How is each event in history unique?

## Exit Skills

---

By the end of the Unit 3: One of a Kind, students should be able to...

- ask and answer questions about a text.
- demonstrate understanding of text structure.

- **Content:** Content will be differentiated through use of multilevel readers for Basic Skills students, Special Education students, Talented and Gifted students, as well as ELL students. The readers are all focused upon the same content, however the lexiles differ depending upon the abilities of the student.
- **Process:** The process will be differentiated through supplying three tiers of questioning for basic, intermediate, and advanced learners. Additionally, students will be supplied with sentence stems and differentiated student workbooks to foster student success of the established goals.
- **Product:** The product will be differentiated because student work will be based upon their reading levels and lexiles. Students will be given choice for projects that appeal to their various learning styles to promote confidence and success amongst the students.
- During **Readers Workshop**, teachers will incorporate differentiation through guided reading, the use of leveled readers and strategy groups. Students also have the choice of selecting their own books to read independently. This can be a controlled choice of books so that they are reading on their independent reading level.
