

# Unit 4: The Mathematics of Networking

Content Area: **Math**  
Course(s): **Discrete Mathematics**  
Time Period:  
Length: **35-40 Days/Grades 11-12**  
Status: **Published**

## **Title Section**

---

## **Department of Curriculum and Instruction**

**Belleville Public Schools**

**Curriculum Guide**

**DISCRETE MATHEMATICS & STATISTICS,  
GRADES 11/12**

**THE MATHEMATICS OF NETWORKING**

**Belleville Board of Education**

**102 Passaic Avenue**

**Belleville, NJ 07109**

**Prepared by:** Brian Sapinski, Mathematics Teacher

Dr. Richard Tomko, Ph.D., M.J., Superintendent of Schools

Ms. LucyAnn Demikoff, Director of Curriculum and Instruction K-12

Ms. Nicole Shanklin, Director of Elementary Education K-8, ESL Coordinator K-12

Mr. George Droste, Director of Secondary Education

Board Approved: September 23, 2019

## **Unit Overview**

---

In this unit, students will learn mathematical applications that demonstrate how to manage a specific resource, such as time or energy, in the most efficient manner possible.

These applications include:

- How to sweep over a network with the least amount of backtracking
- How to find the shortest or least expensive route that visits a specific set of locations in a network
- How to create an efficient network that effectively connects people or things

## **Enduring Understanding**

---

**IN THIS UNIT, STUDENTS WILL UNDERSTAND:**

- There are visual and applied differences between paths and circuits.
- Networks can be used to promote efficiency and construct optimal solutions.
- Efficiency within a network or graph can focus on either its vertices or its edges according to a given situation.

## Essential Questions

---

### IN THIS UNIT, WE WILL ASK:

- Why is it useful to represent real-life situations mathematically?
- What real-world events can be modeled using Euler and Hamiltonian paths and circuits?
- How can networks be used to answer real-world problems in the most effective manner?
- Why can any planar map be colored in four colors?

## Exit Skills

---

### BY THE END OF THIS UNIT, THE STUDENT SHOULD BE ABLE TO:

- Construct networks and recognize that they are useful tools in modeling real-life situations
- Find Euler paths and circuits, and solve problems involving them using appropriate algorithms
- Find Hamiltonian paths and circuits
- Use appropriate algorithms to differentiate between Euler and Hamiltonian paths and circuits
- Create, identify and optimally solve Traveling Salesman and Shortest Route Problems using appropriate algorithms
- Determine the optimal solution for connecting a network by a minimum spanning tree
- Use graph coloring to solve conflicts

## New Jersey Student Learning Standards (NJSLS-S)

---

|             |   |
|-------------|---|
| MA.F-IF.A.2 | Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context. |
| MA.K-12.1   | Make sense of problems and persevere in solving them.   |
| MA.K-12.2   | Reason abstractly and quantitatively.   |
| MA.K-12.3   | Construct viable arguments and critique the reasoning of others.  |
| MA.K-12.4   | Model with mathematics.   |
| MA.K-12.5   | Use appropriate tools strategically.  |
| MA.K-12.6   | Attend to precision.  |
| MA.K-12.7   | Look for and make use of structure.   |
| MA.N-VM.A.3 | Solve problems involving velocity and other quantities that can be represented by vectors.  |

## Interdisciplinary Connections

---

|                    |   |
|--------------------|---|
| 9.3.12.BM.1        | Utilize mathematical concepts, skills and problem solving to obtain necessary information for decision-making in business.  |
| LA.RST.9-10.5      | Analyze the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).  |
| LA.RST.11-12.3     | Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.   |
| 9-12.HS-ETS1-3     | Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts. |
| 9-12.HS-ETS1-4.5.1 | Use mathematical models and/or computer simulations to predict the effects of a design solution on systems and/or the interactions between systems.   |

## Learning Objectives

---

- Develop a network diagram that models a real-life situation
- Interpret key terms related to networks (vertices, edges, degree, loop, bridge)
- Test algorithms that can identify the existence of an Euler path or circuit, then outline it
- Reconstruct networks to semi-Eulerize or Eulerize them
- Diagram Hamiltonian paths and circuits in a network
- Diagram the shortest Hamiltonian circuit in a network by testing an algorithm (Brute Force, Nearest Neighbor, Repetitive Nearest Neighbor, Cheapest Link)
- Diagram minimum spanning trees within a network
- Design a map coloring within a network to solve real-life conflicts

**Action Verbs:** Below are examples of action verbs associated with each level of the Revised Bloom's Taxonomy.

| Remember  | Understand    | Apply      | Analyze       | Evaluate  | Create      |
|-----------|---------------|------------|---------------|-----------|-------------|
| Choose    | Classify      | Choose     | Categorize    | Appraise  | Combine     |
| Describe  | Defend        | Dramatize  | Classify      | Judge     | Compose     |
| Define    | Demonstrate   | Explain    | Compare       | Criticize | Construct   |
| Label     | Distinguish   | Generalize | Differentiate | Defend    | Design      |
| List      | Explain       | Judge      | Distinguish   | Compare   | Develop     |
| Locate    | Express       | Organize   | Identify      | Assess    | Formulate   |
| Match     | Extend        | Paint      | Infer         | Conclude  | Hypothesize |
| Memorize  | Give Examples | Prepare    | Point out     | Contrast  | Invent      |
| Name      | Illustrate    | Produce    | Select        | Critique  | Make        |
| Omit      | Indicate      | Select     | Subdivide     | Determine | Originate   |
| Recite    | Interrelate   | Show       | Survey        | Grade     | Organize    |
| Select    | Interpret     | Sketch     | Arrange       | Justify   | Plan        |
| State     | Infer         | Solve      | Breakdown     | Measure   | Produce     |
| Count     | Match         | Use        | Combine       | Rank      | Role Play   |
| Draw      | Paraphrase    | Add        | Detect        | Rate      | Drive       |
| Outline   | Represent     | Calculate  | Diagram       | Support   | Devise      |
| Point     | Restate       | Change     | Discriminate  | Test      | Generate    |
| Quote     | Rewrite       | Classify   | Illustrate    |           | Integrate   |
| Recall    | Select        | Complete   | Outline       |           | Prescribe   |
| Recognize | Show          | Compute    | Point out     |           | Propose     |

|                     |  |  |          |  |   |
|---------------------|--|--|----------|--|---|
| Repeat<br>Reproduce | Summarize<br>Tell<br>Translate<br>Associate<br>Compute<br>Convert<br>Discuss<br>Estimate<br>Extrapolate<br>Generalize<br>Predict | Discover<br>Divide<br>Examine<br>Graph<br>Interpolate<br>Manipulate<br>Modify<br>Operate<br>Subtract | Separate |  | Reconstruct<br>Revise<br>Rewrite<br>Transform |
|---------------------|--|--|----------|--|---|

### **Suggested Activities & Best Practices**

**STUDENTS WILL REACH OBJECTIVES AND ACQUIRE SKILLS & UNDERSTANDING THROUGH:**

- Examination and performance on problems selected from the texts
- Student groups with assigned specific roles that can assist each other in overall understanding
- Exit tickets to offer additional summary of key concepts, level of understanding and additional questions

- Project-based learning for students to construct networks, paths and circuits using geographic elements

## **Assessment Evidence - Checking for Understanding (CFU)**

---

SPECIFIC SAMPLES INCLUDE:

- Exit tickets at the close of each lesson will address definitions, concepts and formulas (EX: Recognize when certain networks are capable of having Euler paths/circuits with additional connections) (Formative)
  - Demonstrating a proper comparison of algorithms for the same Traveling Salesman Problem (Formative)
  - Chapter Test/Quiz (Summative)
  - Common Quarterly/Benchmark Exams - Quarter 3 Exam for this unit (Benchmark)
  - Web-Based Assessments (using Google Forms, ALEKS, Edulastic, Khan Academy, etc.) (Formative/Summative)
- 
- Admit Tickets
  - Common Benchmarks
  - Compare & Contrast
  - Define
  - Describe
  - Evaluate
  - Evaluation rubrics
  - Exit Tickets
  - Explaining
  - Illustration
  - Quizzes
  - Self- assessments
  - Study Guide
  - Surveys
  - Teacher Observation Checklist
  - Think, Pair, Share
  - Think, Write, Pair, Share
  - Unit review/Test prep
  - Unit tests
  - Web-Based Assessments

## **Primary Resources & Materials**

---

- Excursions in Modern Mathematics 9th edition textbook (Frank Tannenbaum)
- Excursions in Modern Mathematics 6th edition textbook (Frank Tannenbaum)

## **Ancillary Resources**

---

Sample web pages based on material are included here. This list will be edited as more reference material is found.

- <https://slideplayer.com/slide/7805935/>

## **Technology Infusion**

---

GOOGLE SHEETS: Students will use Google Sheets within their Chromebooks for the tasks described:

- TRAVELING SALESMAN PROBLEM: Construction of tables for determining shortest Hamiltonian routes by various algorithms

## Alignment to 21st Century Skills & Technology

Mastery and infusion of 21st Century Skills & Technology and their Alignment to the core content areas is essential to student learning. The core content areas include:

- English Language Arts;
- Mathematics;
- Science and Scientific Inquiry (Next Generation);
- Social Studies, including American History, World History, Geography, Government and Civics, and Economics;
- Technology

|                   |   |
|-------------------|---|
| CRP.K-12.CRP4     | Communicate clearly and effectively and with reason.                                |
| CRP.K-12.CRP6     | Demonstrate creativity and innovation.  |
| CRP.K-12.CRP8     | Utilize critical thinking to make sense of problems and persevere in solving them.  |
| CRP.K-12.CRP9     | Model integrity, ethical leadership and effective management.                       |
| CRP.K-12.CRP11    | Use technology to enhance productivity.   |
| CAEP.9.2.12.C.1   | Review career goals and determine steps necessary for attainment.                   |
| TECH.8.1.12.E.CS4 | Process data and report results.  |
| TECH.8.1.12.F.CS1 | Identify and define authentic problems and significant questions for investigation. |
| TECH.8.1.12.F.CS2 | Plan and manage activities to develop a solution or complete a project.             |
| TECH.8.1.12.F.CS3 | Collect and analyze data to identify solutions and/or make informed decisions.      |
| TECH.8.1.12.F.CS4 | Use multiple processes and diverse perspectives to explore alternative solutions.   |

## **21st Century Skills/Interdisciplinary Themes**

---

- Communication and Collaboration
- Creativity and Innovation
- Critical thinking and Problem Solving
- ICT (Information, Communications and Technology) Literacy
- Life and Career Skills

## **21st Century Skills**

---

- Civic Literacy
- Financial, Economic, Business and Entrepreneurial Literacy
- Global Awareness

## **Differentiation**

---

SPECIFIC EXAMPLES INCLUDE:

- Small task-oriented groups where each member is responsible for identifying key routes, tallying, etc. within a Traveling Salesman problem
- Manilatives: Colored index cards for students to lay out map coloring based on seating position

- Study guides provided prior to quizzes and tests

**Differentiations:**

- Small group instruction
- Small group assignments
- Extra time to complete assignments
- Pairing oral instruction with visuals
- Repeat directions
- Use manipulatives
- Study guides
- Rephrase written directions
- Additional time
- Preview vocabulary
- Preview content & concepts
- Highlight text
- Student(s) work with assigned partner
- Visual presentation
- Assistive technology
- Small group setting

**Hi-Prep Differentiations:**

- Alternative formative and summative assessments
- Games and tournaments
- Group investigations
- Independent research and projects
- Interest groups
- Project-based learning
- Problem-based learning
- Tiered activities/assignments
- Varying organizers for instructions

**Lo-Prep Differentiations:**

- Exploration by interest
- Flexible grouping
- Goal setting with students
- Mini workshops to re-teach or extend skills
- Open-ended activities
- Think-Pair-Share
- Varied supplemental materials

## **Special Education Learning (IEP's & 504's)**

---

**SPECIFIC EXAMPLES INCLUDE:**

- Note cards for instructions for applying Hamiltonian algorithms (Brute Force, Nearest Neighbor)

- One-on-one oral questioning during testing to elicit responses
- printed copy of board work/notes provided
- additional time for skill mastery
- assistive technology
- behavior management plan
- Center-Based Instruction
- check work frequently for understanding
- computer or electronic device utilizes
- extended time on tests/ quizzes
- have student repeat directions to check for understanding
- highlighted text visual presentation
- modified assignment format
- modified test content
- modified test format
- modified test length
- multiple test sessions
- multi-sensory presentation
- preferential seating
- preview of content, concepts, and vocabulary
- Provide modifications as dictated in the student's IEP/504 plan
- reduced/shortened reading assignments
- Reduced/shortened written assignments
- secure attention before giving instruction/directions
- shortened assignments
- student working with an assigned partner
- teacher initiated weekly assignment sheet
- Use open book, study guides, test prototypes

## **English Language Learning (ELL)**

---

### SPECIFIC EXAMPLES INCLUDE:

- Translated material
- Peer partners for assignments and tests with students that can translate material and meanings of concepts verbally
- teaching key aspects of a topic. Eliminate nonessential information
- using videos, illustrations, pictures, and drawings to explain or clarify
- allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning;
- allowing students to correct errors (looking for understanding)

- allowing the use of note cards or open-book during testing
- decreasing the amount of work presented or required
- having peers take notes or providing a copy of the teacher's notes
- modifying tests to reflect selected objectives
- providing study guides
- reducing or omitting lengthy outside reading assignments
- reducing the number of answer choices on a multiple choice test
- tutoring by peers
- using computer word processing spell check and grammar check features
- using true/false, matching, or fill in the blank tests in lieu of essay tests

## **At Risk**

---

### SPECIFIC EXAMPLES INCLUDE:

- Printed or video copy of material missed during excessive absences
  - Corrections of incorrect work from tests
  - Rewriting of test questions to include options for network connection steps for student to execute within the work on free-response test questions
- 
- allowing students to correct errors (looking for understanding)
  - teaching key aspects of a topic. Eliminate nonessential information
  - allowing products (projects, timelines, demonstrations, models, drawings, dioramas, poster boards, charts, graphs, slide shows, videos, etc.) to demonstrate student's learning
  - allowing students to select from given choices
  - allowing the use of note cards or open-book during testing
  - collaborating (general education teacher and specialist) to modify vocabulary, omit or modify items to reflect objectives for the student, eliminate sections of the test, and determine how the grade will be determined prior to giving the test.
  - decreasing the amount of work presented or required
  - having peers take notes or providing a copy of the teacher's notes
  - marking students' correct and acceptable work, not the mistakes
  - modifying tests to reflect selected objectives
  - providing study guides
  - reducing or omitting lengthy outside reading assignments
  - reducing the number of answer choices on a multiple choice test
  - tutoring by peers
  - using authentic assessments with real-life problem-solving
  - using true/false, matching, or fill in the blank tests in lieu of essay tests
  - using videos, illustrations, pictures, and drawings to explain or clarify

## **Talented and Gifted Learning (T&G)**

---

SPECIFIC EXAMPLES INCLUDE:

- Complete "Running"-level problems in textbook containing higher-level thinking
  - Student can construct original examples that can demonstrate full mastery of specific concepts and objectives
  - Provide students with resources to allow them to move forward at a faster pace when they display faster mastery of learning objectives
- 
- Above grade level placement option for qualified students
  - Advanced problem-solving
  - Allow students to work at a faster pace
  - Complete activities aligned with above grade level text using Benchmark results
  - Create a plan to solve an issue presented in the class or in a text
  - Higher order, critical & creative thinking skills, and discovery
  - Multi-disciplinary unit and/or project
  - Teacher-selected instructional strategies that are focused to provide challenge, engagement, and growth opportunities
  - Utilize exploratory connections to higher-grade concepts
  - Utilize project-based learning for greater depth of knowledge
