Interdisciplinary Connections

SCI.1-ESS1-2	<p>Some materials allow light to pass through them, others allow only some light through and others block all the light and create a dark shadow on any surface beyond them, where the light cannot reach. Mirrors can be used to redirect a light beam.</p> <p>Make observations at different times of year to relate the amount of daylight to the time of year.</p> <p>Emphasis is on relative comparisons of the amount of daylight in the winter to the amount in the spring or fall.</p> <p>Assessment is limited to relative amounts of daylight, not quantifying the hours or time of daylight.</p> <p>Seasonal patterns of sunrise and sunset can be observed, described, and predicted.</p>
