

K Math Unit 12: Identify and Describe Shapes

Content Area: **Mathematics**
Course(s):
Time Period: **May**
Length: **2 Weeks**
Status: **Published**

Unit Overview

Topic 12 formally introduces many geometric ideas by asking students to:

1. identify shapes as two-dimensional (flat) or three-dimensional (solid)
2. name squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres regardless of orientation and size, and
3. use terms such as "above," "below," "beside," "next to," "in front of," and "behind" to describe the relative position of shapes in their environments.

Standards

| | |
|-------------|--|
| MA.K.G.A.1 | Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to. |
| MA.K.G.A.2 | Correctly name shapes regardless of their orientations or overall size. |
| MA.K.G.A.3 | Identify shapes as two-dimensional (lying in a plane, "flat") or three-dimensional ("solid"). |
| MA.K.G.B.4 | Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length). |
| MA.K.CC.A.1 | Count to 100 by ones and by tens. |

Interdisciplinary Connections

Topic 1 Math and Science Project - Using different presentations tools, students will collect different types of paper. Talk about the uses of paper. Tell how strong each type of paper is. Tell how the paper feels. Tell if the paper can soak up water.

ELA:

RI.2.10. Read and comprehend informational texts, including history/social studies, science, and technical texts, at grade level text complexity proficiently with scaffolding as needed.

Science:

K-2-ETS1-2. Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.

21st Century Life Literacies & Key Skills

Critical Thinking and Problem Solving:

Problem-solving activities starting with the lesson "Solve and Share" and ending with higher order thinking questions that utilize the mathematical practices

Communication and Collaboration:

Throughout the lesson, students are provided with opportunities to discuss their ideas as they investigate mathematical concepts.

Creativity:

Students have opportunities to express their creativity by solving problems their own way, participating in performance tasks, and group projects.
