

# K Math Unit 14: Describe and Compare Measurable Attributes

Content Area: **Mathematics**  
Course(s):  
Time Period: **June**  
Length: **2 Weeks**  
Status: **Published**

## Unit Overview

---

Topic 14 introduces measurement by teaching students that objects can be directly compared by length, height, capacity, or weight.

Students learn that objects can be described by measurable attributes and that some objects can be describe by more than one measurable attribute.

They describe the length or height of objects as a whole number of units.

## Standards

---

MA.K.MD.A.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.
MA.K.MD.A.2	Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference.
