

6 Math Unit 04: Percents

Content Area: **Mathematics**
Course(s):
Time Period: **December**
Length: **13 days**
Status: **Published**

Unit Overview

This chapter is your students' first formal introduction to percents, though it is hard to imagine that they have not heard percents referenced in school, the news, or advertisements. Asking students what percents are and what they mean is an interesting way to begin the chapter. A major goal of this chapter is to describe percents as another way of representing fractions and decimals.

Standards

MATH.6.RP.A.3	Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.
MATH.6.RP.A.3.c	Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means 30/100 times the quantity); solve problems involving finding the whole, given a part and the percent.
MATH.6.NS.C.7.a	Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram.
MATH.6.NS.C.7.b	Write, interpret, and explain statements of order for rational numbers in real-world contexts.

Interdisciplinary Connections

Topic 4 STEM Project - Design a Bridge: In this project, students design a bridge for their community from the task assigned in Topic 3. Students use the engineering design process to propose solutions.

Science Connection - Students to apply the engineering design process to find possible solutions to the problem identified. They develop models and determine similarities and differences among design solutions.

ELA.SL.PE.6.1

Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.

SCI.MS-ETS1-1

Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
