Standards

| | |
|-----------------|---|
| MATH.7.EE.B.4.a | Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p , q , and r are specific rational numbers. Solve equations of these forms with accuracy and efficiency. Compare an algebraic solution to an arithmetic solution, identifying the sequence of the operations used in each approach. |
| MATH.7.EE.B.4.b | Solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p , q , and r are specific rational numbers. Graph the solution set of the inequality and interpret it in the context of the problem. |

Interdisciplinary Connections

Topic 4 STEM Project - Analyze Activity Tracker Data

In this project, students extend the Topic 3 STEM project. They will research current activity and health recommendations, like target heart rate and steps per day. Students will set activity goals and write expressions and equations to represent these goals and to track progress.

Science Connection -

Students consider how activities relate to physiological responses including changes in heart rate, blood pressure, breathing rate, and other factors calculated by activity trackers.

ELA: NJLSA.R1. Read closely to determine what the text says explicitly and to make logical inferences and relevant connections from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.

Science: MS-ETS1-1. Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.

Climate Change:

- **Climate Change:** Students may solve real-world problems involving the four operations with rational numbers related to the relationship between altitude and the temperature above sea level.
- **Climate Change:** Students may solve multi-step real-life problems posed with positive and negative rational numbers in any form related to the relationship between altitude and the temperature above sea level.
