K Science Unit 1: Severe Weather (Wild Weather)

Content Area: **Science**
Course(s):
Time Period: **Marking Period 2**
Length: **9 Weeks**
Status: **Published**

Unit Overview

In this unit, students explore storms and severe weather! They obtain information from weather forecasts to prepare for storms and stay safe. They also practice describing the various characteristics of weather (wind, clouds, temperature, and precipitation) in order to make their own predictions about storms.

Standards

Scientific & Engineering Practices

- Students obtain information through virtual observations of different types of severe weather - thunderstorms, hurricanes, tornadoes, and blizzards. They use this information to ask questions about what is needed in order to be prepared and stay safe during these different types of severe weather.
- Students create a Breeze Buddy, a simple tool that allows them to observe how hard the wind is blowing. They use this tool to obtain information about the wind and ask questions about other ways to forecast the weather.
- Students obtain information through observations of the weather. They communicate the information by acting as a weather watcher and creating drawings of the weather conditions

Crosscutting Concepts

- Students explore the cause and effect relationship between weather tracking and storm preparation.
- Students explore the cause and effect relationship between weather tracking and storm preparation.
- Students observe weather patterns. They understand weather as a pattern in the natural world

SCI.K-ESS2-1	Use and share observations of local weather conditions to describe patterns over time.
SCI.K-ESS3-2	Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.
