Unit Overview

Unit Title: Foundations of History

Essential Question: How does Liberty State Park relate to geography and how humans interact with geography?

- Locate key geographic features on a map of Earth: the equator, the prime meridian, the four hemispheres, the five oceans, and the seven continents.
- Identify countries on a map of North America.
- Identify states and communities on a map of the southeastern United States.
- Identify cardinal and intermediate directions, and use a compass rose.
- Use map skills to locate communities on a map, determine directions, and measure distances between various locations.
- Single out a landmark for which your community is known, and commemorate it with a drawing.
- Identify and describe the physical features, climate, and natural resources of various geographic areas, including the local community.
- Compare and contrast different regions in terms of their geographic characteristics.
- Use map tools: scale, grid, key (legend), symbols, title, and compass rose.
- Identify and describe the diverse environments of North America that were home to a variety of Native American groups.
- Discuss the ways in which physical geography, including climate, influenced how Native Americans adapted to their natural environment.
- Describe the identities, religious beliefs, customs, and various folklore traditions of Native American groups.

visualizations, graphs, diagrams, aerial and other photographs, GPS).

Geography, People, and the Environment: Spatial Views of the World

Regions form and change as a result of unique physical conditions, economies, and cultures.

Human activities affect environmental characteristics of places or regions resulting in positive and negative impacts.

Maps and other geographic representations, geospatial technologies, and spatial thinking can be used to understand and communicate information.
