Unit Overview

Unit Title: The Southwest

Essential Question:

How have geography and history shaped life in the Southwest?

Standards

SOC.6.1.5.EconEM.2	Identify examples of the variety of resources that are used to produce goods and services (i.e., human capital, physical capital, natural resources).
SOC.6.1.5.EconEM.3	Describe how supply and demand influence price and output of products.
SOC.6.1.5.EconEM.4	Compare different regions of New Jersey to determine the role that geography, natural resources, climate, transportation, technology, and/or the labor force play in economic opportunities.
SOC.6.1.5.EconNE.3	Describe how the development of different transportation systems impacted the economies of New Jersey and the United States.
SOC.6.1.5.GeoGI.4	Explain how cultural and environmental characteristics affect the distribution and movement of people, goods, and ideas.
SOC.6.1.5.GeoHE.3	Analyze the effects of catastrophic environmental and technological events on human settlements and migration.
SOC.6.1.5.GeoPP.2	Describe how landforms, climate and weather, and availability of resources have impacted where and how people live and work in different regions of New Jersey and the United States.
SOC.6.1.5.GeoPP.3	Use geographic models to describe how human movement relates to the location of natural resources and sometimes results in conflict. An economy accounts for the benefits and costs of individual choices in dealing with the scarcity of finite resources. The availability of human capital, physical capital, and/or natural resources has contributed to the specialization of trade and production. The exchange of goods and services can have negative and positive effects. Human activities affect environmental characteristics of places or regions resulting in positive and negative impacts.
