Social Contract Theory of Government □

Locke argued that the best way for each person's natural rights to be protected so that everybody could live in peace and enjoy their rights was for each person to agree with others to create and live in a government and give that government the authority to make and enforce laws □

Individuals give up the right to do anything they please in return for security provided by government, including protection of individual rights

Individuals surrender those rights they do not want others to use against them in order to enjoy the rest of their rights

One of the most dominant theories within moral and political theory throughout the history of the modern West □

Examples of social contracts: The Mayflower Compact, New Jersey and other state constitutions, U.S. Constitution
