Content Area: **Technology**
Course(s):
Time Period: **April**
Length: **4 Days**
Status: **Published**

Unit Overview

Kerbal Space Program is an engineering platform that Galloway students use to design, construct, and fly virtual rockets. Students will first learn to navigate the interface, thus beginning their understanding of fundamentals of 3d design software. They will then be given a series of engineering tasks, such as constructing a rocket that can reach space. Students will use the design cycle to refine their rocket constructions, deciding collaboratively how best to achieve their engineering targets.
