Content Area: **Technology**  
Course(s):  
Time Period: **November**  
Length: **5 Days**  
Status: **Published**

## Unit Overview

---

Students will use a variety of development environments to learn fundamentals of computer programming. From simple drag-and-drop programming to full text entry, students will learn scripting, loops, if-then statements, graphical commands, XY coordinates, and other basic programming concepts. Students will create both script programs and event-driven programs during the course of the unit, as well as developing assets for their programs. In the end, students will share their creations with each other, giving and getting feedback on how to improve their programs.
