Unit Overview

This project is an integration with the 5th grade social studies classes. Students will work together to build a village based on their study of Native American regions in the pre-Colonial era of North America. Students will be required to select and use region-appropriate materials and architectural styles in creating their village. Students will need to create a functional village addressing all the needs of a human society including, but not limited to: shelter, food and water supply, and social structures. Students will then visit each others' villages and compare and contrast the approaches taken by each "student tribe".
